Suno Community Analysis: suno_chat_2024_06

Generated: 2026-04-01 17:55

Chunk 1: 2024-06-01 to 2024-06-04

Not enough evidence in the logs.

This chunk contains several contentious topics, but most are about moderation, contest fairness, and platform rules rather than deeper ethical/legal AI-music disputes. Below are the topics that are clearly supported by the logs and tied to ethical/moral/legal use issues.

Topic: Rule Enforcement on Non-Suno / Off-Topic Content

Description

A sustained tension develops around whether users are posting content appropriate to the server and how strictly rules should be enforced. The conflict is tied to community norms and moderation fairness rather than AI generation ethics itself, but it does relate to acceptable use of the Suno community space. The dispute begins when users question whether a posted song is actually AI/Suno-related and escalates into accusations about repeated rule-breaking and complaints that the server feels “hostile.” The discussion evolves from initial fact-checking (“is the song itself AI or not”) into public shaming about prior rule violations, then into debate over whether this is legitimate moderation or excessive hostility.

Timeline

- **2024-06-01 00:11:45–00:15:17**
- **2024-06-01 00:18:47–00:23:08**
- **2024-06-01 01:52:27–01:55:24**
- **2024-06-04 19:12:19–19:14:13**

Discussion starts with confusion over whether shared content is actually Suno-generated. It escalates when multiple users accuse one user of repeatedly forgetting rules and posting non-Suno material. Another participant calls the environment “hostile,” while others defend the enforcement as just rule

application. Later, similar rule-enforcement appears again when users tell someone to keep things Suno-related and when a Suno team member/moderation presence removes non-Suno content.

Key Participants

_halloausberlin.
- Idea: Repeatedly insists the server should only contain Suno-related material and challenges whether posted songs are AI/Suno-generated.
- Stance: critical
- Attitude: firm, admonishing
- Evidence:
- "Suno does not generate videos"
- Explanation: Shows active correction of what counts as valid Suno-related content.
- "Yes but is the song itself AI or not"
- Explanation: Demonstrates insistence on verifying whether content belongs in the server.
- "There’s a difference between being hostile and enforcing the rules"
- Explanation: Explicitly frames the dispute as rule enforcement rather than personal hostility.

.derbaum.
- Idea: Supports strict enforcement, references logs of prior behavior, and removes off-topic content.
- Stance: critical
- Attitude: sarcastic, policing
- Evidence:
- "is it possible that this already was the second time you forgot about the rules?"
- Explanation: Indicates this is viewed as repeated misconduct, not a one-off mistake.
- "that you are not timeoted already says that you can stay"
- Explanation: Reinforces punitive framing and ongoing monitoring.
- "i have the feeling that is not made with suno... let me remove that for you"
- Explanation: Shows direct action against content deemed outside scope.

bhadghallll5
- Idea: Admits confusion about the type of server and apologizes for posting the wrong kind of content.
- Stance: neutral
- Attitude: apologetic, flustered
- Evidence:
- "I didn’t know what type of server this was"
- Explanation: Direct admission of misunderstanding server purpose.
- "Sozzz"
- Explanation: Informal apology supports the interpretation of a conciliatory stance.

guywith2names
- Idea: Objects to the tone of the server during enforcement and calls it hostile.
- Stance: critical
- Attitude: frustrated
- Evidence:
- "i didnt know a music ai app discord was hostile lol"
- Explanation: Explicit complaint that the enforcement atmosphere feels hostile.

heliostasus
- Idea: Reinforces Suno-only posting norms and calls for stronger moderation.
- Stance: critical
- Attitude: corrective

- Evidence:
- "Sorry this is a Suno chat room"
- Explanation: Polices boundaries of acceptable content.
- "Ban Next time @Mr.Tree■"
- Explanation: Escalates from correction to advocating punishment.

brewert23
- Idea: Pushes back against non-moderators policing and responds combatively.
- Stance: critical
- Attitude: confrontational
- Evidence:
- "ur not a mod"
- Explanation: Challenges legitimacy of peer enforcement.
- "hush up user"
- Explanation: Aggressive response that increases tension.

Suno Team Response

furrybeans [Suno Team]
- Participates in the broader moderation atmosphere but does not give a direct policy statement resolving the dispute.
- Evidence:
- "*Quietly observes from the corner, noting down the events that have occurred today*"
- Explanation: Indicates awareness from the Suno team without a substantive intervention on this topic.

Additional Evidence (Optional)

"_halloausberlin.: The song itself AI or not"
Explanation: Reinforces that inclusion criteria in the server are being contested around AI-origin status.

Topic: Fairness of Trending / Contest Metrics and Suspected Artificial Promotion

Description

A recurring contentious topic is whether likes/listens/trending are fair indicators of quality, especially in the context of contests and prize money. Users repeatedly question whether high play counts come from bots, outside audiences, organized like-trading, or existing followers rather than musical merit. The tension is ethical because it concerns manipulation of platform metrics and fairness of a contest with monetary rewards. The discussion evolves from general suspicion about million-like songs to more explicit claims that views can be generated artificially, that major creators or streamers could dominate, and that dislike-bombing may suppress competitors.

Timeline

- **2024-06-01 00:36:21–01:18:06**
- **2024-06-01 01:22:32–01:31:26**
- **2024-06-01 01:34:44–01:45:55**
- **2024-06-01 02:02:17–02:02:37**
- **2024-06-01 10:56:10–11:13:58**
- **2024-06-04 09:52:55–10:06:58**
- **2024-06-04 21:56:24–22:06:44**

The topic starts with users asking how anyone can “compete” with songs that already have huge engagement. It then shifts into explicit suspicion of bots and outside traffic, followed by anxiety about the Summer of Suno prize pool attracting large creators with preexisting audiences. Later, users discuss how views and likes determine success, joke about “inside jobs,” and eventually complain about dislike-bombing and manipulated trending behavior during the contest period.

Key Participants

alienanal
- Idea: Questions whether very high play counts are organic and whether contests force users to compete against bots or preexisting followings.
- Stance: critical
- Attitude: skeptical, frustrated
- Evidence:
- "Clearly it's bots being used to get those high numbers. Now there is a prize pool and we have to compete against bots?"
- Explanation: Directly alleges manipulation and ties it to contest unfairness.
- "How is anyone going to be able to compete against the tunes that somehow have a million likes?"
- Explanation: Frames the issue as structural unfairness.

nefarius_
- Idea: Suggests huge listen counts are driven by bots or outside sources and points to suspicious ratios.
- Stance: critical
- Attitude: analytical, skeptical
- Evidence:
- "The disproportion between listens/likes is also indicative"
- Explanation: Uses metric mismatch as evidence of suspicious activity.
- "I don't know what else it would be if someone has tens of thousands of listens within a few hours"
- Explanation: Expresses doubt that such growth is organic.

taminalina
- Idea: States that play counts can be generated by users themselves.
- Stance: critical
- Attitude: casual, suggestive
- Evidence:
- "play count you can generate by your own, thats why they have so much ■"
- Explanation: Explicitly claims self-generated play inflation is possible.

odd101
- Idea: Worries that users without followings have “no shot” in the contest and that influencer participation would make it unwinnable.
- Stance: critical
- Attitude: pessimistic

- Evidence:
- "us with actual no following dont got a shot at top 5"
- Explanation: Direct statement that contest success depends on existing audience.
- "easy win"
- Explanation: Says creators with followers can simply mobilize them.

steicamel
- Idea: Suggests the contest is structured to attract large creators and repeatedly comments on unfairness or likely outcomes.
- Stance: critical
- Attitude: cynical
- Evidence:
- "They trying to coax big social media people to join obv."
- Explanation: Explicitly states belief that contest is designed around influencer recruitment.
- "Calling it now all the top songs are bland simple mode single gens by new users"
- Explanation: Predicts low-quality but advantaged entries will dominate.

gamezbrown
- Idea: Says the prize money will go to bots and YouTubers.
- Stance: critical
- Attitude: blunt
- Evidence:
- "1 million dolars paidi to bots and youtubers bois"
- Explanation: Directly frames the contest as benefiting manipulators and influencers.

zara4527
- Idea: Pushes back, arguing trending can happen organically and explaining that once a song hits top positions, exposure compounds.
- Stance: supportive
- Attitude: explanatory, defensive
- Evidence:
- "one of my songs went #1 and definitely wasnt me botting anyway"
- Explanation: Direct rebuttal to the botting accusation.
- "Once you get into top 3 on trending views just happen because everyone sees your song"
- Explanation: Offers an alternative explanation for high numbers.

taminalina
- Idea: Says the contest is “best promo for SUNO, but not for musicians.”
- Stance: critical
- Attitude: wry
- Evidence:
- "Best Promo for SUNO, but not for musicans ■"
- Explanation: Critiques the contest as benefiting the platform more than creators.

Suno Team Response

furrybeans [Suno Team]
- No direct response from Suno team in the logs.

Additional Evidence (Optional)

"steicamel: That'd be shady"

Explanation: Shows suspicion around how eligibility and payout handling might affect rankings.

Topic: Content Filtering, PG-13 Rules, and What Lyrics Are Allowed

Description

Users repeatedly debate what kinds of lyrics or themes are allowed, whether “mature” or explicit content is permitted, and how filtering works. This is an ethical/platform-governance issue because it concerns moderation boundaries, censorship, and safety in AI music generation. The discussion evolves from a team question about slurs and PG-13, to users asking whether mature body references or profanity are allowed, to detailed confusion over multiple filters: one for generation, one for front-page visibility, and possibly filters for juvenile/meme content.

Timeline

- **2024-06-01 00:13:25–00:13:42**
- **2024-06-01 02:04:25–02:09:09**
- **2024-06-01 03:51:03–04:08:35**
- **2024-06-01 07:01:13–07:16:33**
- **2024-06-01 07:46:29–07:49:16**
- **2024-06-01 23:59:31–2024-06-02 00:06:21**
- **2024-06-04 07:22:31–07:25:57**
- **2024-06-04 18:55:17–18:56:54**

Initially a Suno team member asks whether a song with offensive language is really PG-13, showing enforcement around slurs. Later users ask if mature body references are allowed in event songs, and others suggest profanity is acceptable only in moderation. By the morning, users distinguish between filters for generating songs and filters for appearing on the front page, with confusion over how “relaxed” the filtering actually is. Later still, users discuss whether politics or references to racism/sexism are tolerated.

Key Participants

artelo
- Idea: Wants clarity on whether “mature” lyrics are allowed, argues content generated by Suno should be allowed, and worries about copyright/protection if songs are made public.
- Stance: critical
- Attitude: uncertain, argumentative
- Evidence:
- "for the event if its... more mature lyrics is that still allowed"
- Explanation: Opens the dispute over what is acceptable.
- "if it canbe generated it should be allowed"
- Explanation: Explicit normative stance against stricter filtering than the model’s own output.
- "If we make it public too... we have to make sure to copyright it too on an outside platform if we don't want it stolen right?"
- Explanation: Connects publication rules with legal vulnerability.

grave2202
- Idea: Worries that swears or inappropriate references will get songs taken down.
- Stance: critical
- Attitude: cautious
- Evidence:
- "i know if i add some inappropiate reference or swear ot my song, it will get taken down"
- Explanation: Shows fear of moderation penalties shaping creative choices.

steicamel
- Idea: Complains about filters blocking seemingly harmless lyrics, later clarifies distinction between front-page filter and generation filter.
- Stance: critical
- Attitude: frustrated
- Evidence:
- "I can't make these lyrics any more PG Suno"
- Explanation: Expresses exasperation with the filter.
- "Literally a chorus about raptors being happy blocks it every time"
- Explanation: Gives a concrete example of overblocking.
- "I mean filter to show up in New section, not to generate the song itself"
- Explanation: Helps define the scope of the dispute.

jonathanfly
- Idea: Explains there are different filters and that the one for public explore pages is stricter.
- Stance: neutral
- Attitude: explanatory
- Evidence:
- "There's a stricter filter on songs that show up on the public Explore pages"
- Explanation: Distinguishes between types of moderation/filtering.

jhaxvile
- Idea: Says users can “get pretty liberal” and that only very extreme content seems blocked.
- Stance: critical
- Attitude: dismissive
- Evidence:
- "you have to make it really bad because i have political songs that aren't pg13 for sure and they're accepted just fine"
- Explanation: Suggests the filter threshold is inconsistently high.

jewishguy613
- Idea: Thinks violence and racist/sexist content are more likely to be the issue.
- Stance: neutral
- Attitude: observational
- Evidence:
- "People must be just putting in racist ot sexist stuff"
- Explanation: Suggests what content may trigger the filter.
- "eh, I found it mostly censored violence"
- Explanation: Gives their observed pattern of moderation.

Suno Team Response

furrybeans [Suno Team]
- Raises PG-13 concern directly around a song that appears to contain a slur.

- Evidence:
- "would you describe its lyrics as PG-13 considering the lyrics around ~30s sound like "F--- a n ----"?"
- Explanation: Shows active moderation around hateful/explicit language.

Additional Evidence (Optional)

"alikan: What we need is a flag that says, PG13 or MEME or SILLY"
Explanation: Shows users trying to resolve ambiguity around content filtering categories.

Topic: Copyright, Ownership, and Reuse of AI-Generated Music

Description

Users repeatedly raise concerns about ownership, copyright protection, theft, distributors, and whether AI-generated songs can be published or monetized. This is a core legal/ethical AI music issue. The discussion evolves from concern about songs being “sniped” if made public, to questions about distributor protections, content ID, and whether free-tier songs can later gain commercial rights, to anxiety about future sound-upload features enabling copyrighted material misuse.

Timeline

- **2024-06-01 02:31:29–02:33:10**
- **2024-06-01 04:03:39–04:08:04**
- **2024-06-01 04:22:40–04:26:41**
- **2024-06-01 05:17:57–05:22:30**
- **2024-06-01 07:30:42–07:31:11**
- **2024-06-04 18:36:37–18:40:35**
- **2024-06-04 21:18:19–21:23:26**
- **2024-06-04 23:46:59–23:49:01**
- **2024-06-04 14:54:49–14:55:07**
- **2024-06-04 15:16:01–15:19:23**

First, users worry that making songs public might expose them to theft. Later, several users discuss distribution platforms, Content ID, and frustration with unauthorized uploads. The legal side expands when users ask whether songs made on free vs paid plans can be commercialized and who owns what. Finally, anticipation around the sound-upload feature raises concern that people may upload copyrighted songs or voices, with multiple users warning this could create legal trouble.

Key Participants

artelo
- Idea: Fears public songs can be stolen unless externally copyrighted.
- Stance: critical
- Attitude: worried
- Evidence:
- "we have to make sure to copyright it too on an outside platform if we don't want it stolen right?"
- Explanation: Explicit concern about ownership vulnerability after publication.

Deleted User
- Idea: Is exhausted by copyright complaints and says DistroLock has not been enough.
- Stance: critical
- Attitude: frustrated
- Evidence:
- "God I'm so exhausted of filing copyright complaints"
- Explanation: Indicates repeated actual disputes over ownership.
- "Honestly DistroLock does nothing I'm so fed up"
- Explanation: Critiques available anti-theft tooling.

steicamel
- Idea: Discusses distribution services and their drawbacks; says TuneCore “scams people apparently.”
- Stance: critical
- Attitude: practical, skeptical
- Evidence:
- "Landr rejects everything and distrokid costs too much for content ID and tunecore scams people apparently"
- Explanation: Summarizes distribution/platform frustrations.

drakolyr
- Idea: Says song theft is real and repeatedly notes need for a Suno distributor.
- Stance: critical
- Attitude: matter-of-fact
- Evidence:
- "there are a lot of songstealers..."
- Explanation: Directly states theft is a recurring concern.
- "We REALLY need a Suno Distributor..."
- Explanation: Calls for a native solution.

wetcircuit
- Idea: Explains DistroLock behavior and later clarifies free vs paid rights.
- Stance: neutral
- Attitude: explanatory
- Evidence:
- "DistroLock even blocks DistroKid from uploading to stores"
- Explanation: Describes operational issue with anti-theft tooling.
- "you don't have the rights to music you generate with a free account"
- Explanation: Clear statement about ownership/commercial rights limits.

Deleted User
- Idea: Wants to know whether free-tier songs can later be monetized after subscribing.
- Stance: neutral
- Attitude: uncertain
- Evidence:
- "I can monetize songs made with free membership later with paid memebership ?"
- Explanation: Direct ownership/rights question.

furrybeans [Suno Team]
- Idea: Warns that paid-only access to sound-upload features may reduce abuse and notes concern about deepfaked voices.
- Stance: neutral
- Attitude: cautious

- Evidence:
- "Having it for paid subs only gives another reason to subscribe and hopefully makes it more likely people will follow the ToS"
- Explanation: Suggests a compliance strategy for legal-risky features.
- "which raises the interesting question of how much Suno care about deepfaking voices..."
- Explanation: Acknowledges potential voice-rights issues.

Suno Team Response

furrybeans [Suno Team]
- Clarifies legal/compliance concerns around future upload features and implies safeguards may rely partly on subscription gating.
- Evidence:
- "If it's available for free users you can guarantee there'll be people throwing downloaded MP3s at it"
- Explanation: Explicitly identifies copyright abuse risk.
- "if someone gets banned, they'd have to take out another sub rather than just make a new account and do it again"
- Explanation: Explains a moderation/compliance rationale.

Additional Evidence (Optional)

"Deleted User: my songs got copywrite restriction on youtube"
Explanation: Shows users are already encountering copyright/platform enforcement issues outside Suno.

Topic: Upcoming Sound Upload / Voice-Mimic Feature and Potential Misuse

Description

A major ethically charged topic appears late in the logs: the upcoming feature allowing uploaded sounds or voice samples to seed songs. Users are excited, but tension appears around misuse risks—copyrighted audio, celebrity voices, fake songs, and deepfakes. The discussion evolves from excited discovery of what the feature can do, to speculation about using personal instruments and voices, to explicit concern about illegal uploads and responsibility for misuse.

Timeline

- **2024-06-02 01:45:39–02:45:39** (early abstract discussion about future voices/fixed voices)
- **2024-06-04 18:57:35–19:03:53**
- **2024-06-04 21:12:00–21:25:18**
- **2024-06-04 23:46:99–2024-06-05 00:05:49**
- **2024-06-05 04:46:59–05:06:18**

The topic becomes explicit when users discuss audio upload as a future or alpha-tested feature. It quickly turns into concern over uploading copyrighted songs, cloning voices, and using celebrity

samples. Team/mod-linked testers emphasize that the user would be responsible for copyright misuse, while others speculate on possible safeguards and subscription restrictions.

Key Participants

.derbaum.
- Idea: Enthusiastically reports that upload-based generation is a “gamechanger,” giving examples like dial-up modem trap, cat purring basslines, and voice synthesis experiments.
- Stance: supportive
- Attitude: excited
- Evidence:
- "i made Dail-up modem noise Trap.. and it worked way better then i would have ever expected"
- Explanation: Concrete example of transformative potential.
- "its a gamechanger"
- Explanation: Direct evaluation of the feature’s significance.

3daizy
- Idea: Shows the feature can clone/continue from a short voice sample and advises users to gather samples now.
- Stance: supportive
- Attitude: enthusiastic
- Evidence:
- "I ONLY SUNG 1 SENTENCE: 'This is a test, a simple test'. Then I added lyrics and Suno did the rest."
- Explanation: Demonstrates voice-sample continuation capability.
- "start gathering sounds of anything that would be great to start a sound with"
- Explanation: Encourages future use.

wetcircuit
- Idea: Explains uploaded audio becomes like any other Suno clip in the library and can be extended from.
- Stance: supportive
- Attitude: explanatory
- Evidence:
- "the feature works *exactly* like a regular Suno clip"
- Explanation: Functional description of how upload integrates into workflow.

player_of_the_games
- Idea: Sees huge use cases, especially for intros or user-made snippets, but also worries about how it might be abused or constrained.
- Stance: supportive
- Attitude: excited, curious
- Evidence:
- "the usecases for this are huge"
- Explanation: Strong positive reaction grounded in workflow possibilities.

buba2134
- Idea: Asks directly how copyrighted input will be prevented.
- Stance: critical
- Attitude: cautious
- Evidence:
- "how are they going to stop copyrighted input? Is there a detection feature?"

- Explanation: Directly raises legal misuse concerns.

viperstrikersf5
- Idea: Wants to know whether celebrity voices would be copyright-detected and hopes for personal voice use.
- Stance: neutral
- Attitude: speculative
- Evidence:
- "Aperently suno has dropped the lyrics copyright i was able to use some videogame lyrics"
- Explanation: Shows user is probing boundaries of allowed copyrighted material.
- "I asume celebirty voices are copyright detected"
- Explanation: Raises voice-rights concerns.

Suno Team Response

hellinahandbasket7 [Suno Team]
- Confirms the feature is coming and describes it as capable of continuing from uploaded sounds/music in other styles.
- Evidence:
- "it should be able to continue off that in whatever style or genre you want plus add singing if desired"
- Explanation: Direct functional confirmation from team.

furrybeans [Suno Team]
- States abuse risk with MP3 uploads and suggests subscription gating as one way to reduce it.
- Evidence:
- "there'll be people throwing downloaded MP3s at it and it'd be a headache to deal with"
- Explanation: Directly acknowledges legal misuse risk.
- "if someone gets banned, they'd have to take out another sub rather than just make a new account"
- Explanation: Suggests a practical anti-abuse mechanism.

Additional Evidence (Optional)

"Deleted User: I MADE A SONG OUT OF MY MOM YELLING AT ME??? 100% REAL!!"
Explanation: Hyperbolic but representative of how users immediately imagine novelty and potentially risky upload use cases.

Chunk 2: 2024-06-04 to 2024-06-08

Topic: Manipulation of Trending/Leaderboard and Fairness of Contest Exposure

Description

A recurring point of tension is whether songs and accounts are being unfairly promoted or suppressed on Suno’s trending/discovery systems, especially during contests. Users repeatedly complain about

songs disappearing from trending, “dislike bombing,” suspicious account behavior, and unclear ranking logic. The discussion evolves from scattered suspicions and user-to-user accusations into an official Suno statement acknowledging manipulation risks and describing anti-abuse efforts.

This topic is directly tied to ethical/fairness concerns around platform manipulation and contest integrity. The logs show users framing this as both a community problem and a platform-governance problem.

Timeline

- **2024-06-04 10:56:26–11:05:45**
- **2024-06-04 11:15:37–12:05:38**
- **2024-06-04 12:23:53–13:03:22**
- **2024-06-04 13:03:22–14:31:10**
- **2024-06-04 15:13:50–16:24:15**
- **2024-06-04 23:04:24–23:05:42**
- **2024-06-07 23:59:24–2024-06-08 00:00:36**

How the discussion evolved
- It begins with users raising suspicions about disappearing songs and “viewbots,” e.g. “Suno now has basic counter measures against viewbots.”
- It broadens into accusations and ethical discussion around a prominent user/account cluster, including whether private claims and alternate accounts influence criticism.
- Users then shift to systemic complaints: trending is “a mess,” songs vanish suddenly, and “dislike bombing” is suspected.
- Suno staff formally respond at **2024-06-04 13:03:22**, acknowledging possible manipulation, asking for concrete evidence by DM, and distinguishing the contest leaderboard from the trending page.
- After the official response, users continue to complain that songs are still disappearing, that the update “doesn't really say if they fixed the dislike abuse,” and that some songs appear unfairly suppressed.
- Later, users discuss view counts getting “stuck” and jumping, suggesting continued distrust of the ranking/discovery system.

Key Participants

jewishguy613
- Idea: Repeatedly raises concerns about suspicious account behavior, trending anomalies, and possible manipulation; also distinguishes between ethical concerns and evidence limits.
- Stance: critical
- Attitude: suspicious, analytical, argumentative
- Evidence:
- “if i must, its bc i was pmed by the other person that Nanashi is 14”
- Explanation: Shows he is investigating and challenging claims around identity/account behavior.
- “yeah, I'm not defending catfishing..., just saying features less that 1 week old are not reliable evidence.”
- Explanation: He is still engaged in the controversy while trying to separate weak evidence from stronger evidence.
- “I don't think it's you personally”
- Explanation: In later trending complaints, he shifts from personal accusations to systemic explanations.
- “I think its downvote mechanisms”
- Explanation: Explicitly attributes suppression to platform/dislike mechanics rather than normal ranking.

drakolyr
- Idea: Repeatedly reports “dislike bombing,” says trending is chaotic, and thanks Suno for addressing it while continuing to worry about it.
- Stance: critical
- Attitude: concerned, frustrated, but cooperative
- Evidence:
- “Trending is a mess right now”
- Explanation: Direct criticism of the state of discovery/ranking.
- “Dislike Bombing happened to some songs and users”
- Explanation: Explicit claim of manipulative behavior affecting visibility.
- “I reported my Pride Song Dislike Bomb too”
- Explanation: Shows he treated it as serious enough to formally report.
- “Yeah.. will see”
- Explanation: After the Suno update, he remains unconvinced that the issue is fully resolved.

alikan
- Idea: Defends some accused users from botting allegations while also saying anti-Nanashi botting exists and that reported manipulation has happened.
- Stance: mixed / critical of manipulation, but not of the accused individual
- Attitude: confident, corrective
- Evidence:
- “Nanashi isn't botting”
- Explanation: Clear defense against direct accusation.
- “I do know of a group that were botting anti nanashi music.”
- Explanation: Claims manipulation exists, but directed against rather than by Nanashi.
- “Trending is a mess right now”
- Explanation: Reinforces broader complaint about ranking integrity.
- “I’d expect at least an arc of 6-12 hours if you where at 20 already”
- Explanation: Indicates he sees a sudden disappearance from trending as abnormal.

zara4527
- Idea: Amplifies suspicion by noting songs “pop” into top positions, conspiracy chatter, and “songs about nanashi being exposed.”
- Stance: critical
- Attitude: alarmed, gossipy, incredulous
- Evidence:
- “We got songs about nanashi being exposed”
- Explanation: Shows the conflict has spread into musical callouts and meta-commentary.
- “This conspiracy thing is crazy”
- Explanation: Explicitly labels the atmosphere as conspiratorial/conflictual.
- “There was a whole conspiracy chat earlier about it”
- Explanation: Suggests repeated friction over the issue.

around_once
- Idea: Complains that a song gathered enough likes but still did not hit trending/new, especially frustrating in a contest context.
- Stance: critical
- Attitude: frustrated
- Evidence:
- “mods why does this keep happening i shared my song in my discord channel gathered enough likes fast my song should be on trending but its not”
- Explanation: Direct complaint about ranking/discovery fairness.
- “its for the song contest and i spent alot of time on it”

- Explanation: Connects the issue to contest fairness and effort invested.

steicamel
- Idea: Criticizes the official update as vague and not clearly fixing dislike abuse.
- Stance: critical
- Attitude: skeptical
- Evidence:
- “Doesn't really say if they fixed the dislike abuse, just dances around it :hmm:”
- Explanation: Clear dissatisfaction with the adequacy/clarity of the official response.

wetcircuit
- Idea: Explains bugs and uncertainty around trending, says mods do not control the list, and warns against conspiratorial overreach while acknowledging unreliable evidence and abuse issues.
- Stance: neutral / corrective
- Attitude: pragmatic, skeptical, slightly dismissive
- Evidence:
- “bug where Playlist Search isn't showing the custom thumbnail”
- Explanation: Corrects one suspicion by identifying a mundane bug rather than manipulation.
- “features less that 1 week old are not reliable evidence.”
- Explanation: Pushes back on overinterpreting weak signs.
- “Trending is a blackbox for me... Mods have no jurisdiction to the list.”
- Explanation: Clarifies lack of moderator control and limited visibility into ranking logic.

Suno Team Response

patsuno
- Summary: Acknowledges abuse/manipulation risks, says changes are already in effect and more are coming, asks users to DM concrete evidence, says vague suspicion posts are less helpful, and says the contest leaderboard is different from trending.
- Evidence:
- “We're cognizant of the various possibilities for manipulation and are working to address potential abuse vectors”
- “Some of these changes are already in effect and more are soon to come.”
- “Specific concrete evidence of manipulation is welcome and will be taken very seriously.”
- “It's much less helpful to post vague suspicions that the vibes are off”
- “The contest leaderboard runs according to a different, less gameable algorithm than the trending page.”
- Explanation: This is the clearest official platform stance on fairness, abuse, and contest integrity in the logs.

furrybeans [Suno Team]
- Summary: Corrects misinformation, downplays unsupported inferences, and confirms paid multi-account use is allowed while free-account abuse is not.
- Evidence:
- “The only reason multiple free accounts are not allowed is because nobody is paying for those accounts.”
- Explanation: Relevant because alternate accounts were part of the manipulation/fairness dispute.

Additional Evidence (Optional)

“Today Trending is a bit messy, Dislike Bombing happened to some songs and users”
Explanation: Concise example of users seeing the issue as active and widespread.

Topic: AI Identity/Persona Misrepresentation and “Catfishing” Around User Accounts

Description

A second ethically charged dispute centers on whether users are misrepresenting identity/persona through anime-style or alternate accounts, especially where age or persona claims affect criticism. The logs do not prove identities beyond user messages, but they do contain direct discussion of “catfishing,” fictional ages, “waifu” personas, and whether such presentation creates moral pressure against criticism.

The conflict is less about AI-generated music itself and more about how AI/community personas are presented and received in the music community.

Timeline

- **2024-06-04 11:03:27–11:22:31**
- **2024-06-04 11:50:23–12:03:43**
- **2024-06-04 17:04:58–17:12:40**
- **2024-06-08 14:10:09–14:11:13** (continued references in later manipulation discussion)

How the discussion evolved
- jewishguy613 introduces a concern that someone privately claimed “Nanashi is 14,” which he says conflicts with prior knowledge.
- The discussion shifts from identity suspicion to ethics: whether claiming a fictional age creates a “moral imperative not to criticize.”
- wetcircuit pushes back, saying new features are unreliable evidence and explicitly says they are “not defending catfishing.”
- Others joke about banning “waifu” profile pictures while also comparing personas to stage names.
- Later, the issue reappears as confusion over alternate accounts and impersonation, with a user admitting they moved a song to another account because others accused them of contest manipulation.

Key Participants

jewishguy613
- Idea: Argues that age/persona claims may manipulate criticism norms; questions why someone would choose “14.”
- Stance: critical
- Attitude: suspicious, morally concerned
- Evidence:
- “if i was pmed by the other person that Nanashi is 14”
- Explanation: Introduces the contested age/persona claim directly.
- “the issue is it then creates a moral imperative not to criticize them bc of a fictional age”
- Explanation: This is the clearest statement of the ethical complaint.
- “(also, a broader social critique: the person choose the age 14. why?)”

- Explanation: Explicit concern about the age selected as persona framing.

wetcircuit
- Idea: Distinguishes between weak evidence and actual catfishing concerns; does not defend deception but warns against treating unreliable UI features as proof.
- Stance: neutral
- Attitude: corrective
- Evidence:
- “yeah, I'm not defending catfishing..., just saying features less that 1 week old are not reliable evidence.”
- Explanation: Clear attempt to separate ethical concern from evidentiary weakness.
- “because I trust cat profile pics, but not waifu profile pics”
- Explanation: A joking line, but still expresses a preference against one style of persona signaling.

deafslvt
- Idea: Normalizes hidden persona use by comparing it to stage names.
- Stance: neutral
- Attitude: casual
- Evidence:
- “i think its like how people have stage names etc to hide their true identity and stuff”
- Explanation: Frames persona concealment as common rather than inherently unethical.

watchdog6879
- Idea: Says they moved a song to another account because others claimed they were making music to win the contest and because of repeated dislikes.
- Stance: defensive
- Attitude: defensive, pressured
- Evidence:
- “they claim I making music for win it, so I transferred this song to another account”
- Explanation: Direct statement that account switching was a response to accusations.
- “someone used tons of accounts keep disliking my song, let me out of the game, so i try to use another account”
- Explanation: Connects alternate account use to harassment/manipulation pressure.

Suno Team Response

No response from Suno team in the logs

Additional Evidence (Optional)

“BAN ALL WAIFU!”
Explanation: Joke from wetcircuit, but shows persona presentation itself had become a friction point in the discussion.

Topic: Copyright and Legality of AI Music Distribution, Covers, Lyrics, and Content ID

Description

There is sustained tension over what is legally or contractually allowed with AI-generated songs: registering them with YouTube Content ID, uploading to Spotify, using copyrighted lyrics, posting to distributors, and whether platform terms actually protect users. This is one of the clearest legal/ethical issue clusters in the logs.

The discussion includes:
- whether Suno songs are “original enough” for YouTube Content ID,
- whether copyrighted lyrics are forbidden,
- whether songs made under paid plans can be monetized,
- and whether distributors/platforms reject AI content.

Timeline

- **2024-06-04 11:55:14–12:29:50**
- **2024-06-04 14:15:56–14:17:59**
- **2024-06-04 18:08:06–18:14:18**
- **2024-06-04 22:23:53–22:24:07**
- **2024-06-04 23:23:53–23:29:50**
- **2024-06-07 00:00:36–00:01:16**
- **2024-06-08 18:44:54–18:46:06**

How the discussion evolved
- Users ask if Suno music can be used for YouTube Content ID and Creator Music.
- Stararmy states “Using copyrighted lyrics is against Suno's TOS.”
- wetcircuit says they’ve registered Suno songs and they do not match other fingerprints, except one “that was stolen.”
- Later users discuss Spotify/distributor rules, including whether paid plans allow monetization and whether songs created while unsubscribed remain licensable.
- Suno Team clarifies that the license applies “at its point of creation.”
- Separate late discussion raises concern over a public playlist using copied copyrighted lyrics.

Key Participants

animecruizer
- Idea: Repeatedly asks whether Suno songs are original enough for YouTube Content ID and Creator Music.
- Stance: neutral
- Attitude: cautious
- Evidence:
- “Are the songs created by Suno original enough that we can register it to YouTube Content ID and Creator Music programme?”
- Explanation: Clear legal question around originality and platform eligibility.
- “just worried is it fine to use it for Content ID and Creator Music”
- Explanation: Confirms concern is legal/platform compliance.

stararmy
- Idea: States copyrighted lyrics violate TOS.
- Stance: critical of using copyrighted lyrics
- Attitude: direct
- Evidence:

- “Using copyrighted lyrics is against Suno's TOS”
- Explanation: Direct legal/TOS claim.

wetcircuit
- Idea: Says they have successfully registered Suno songs; fingerprinting generally does not match other songs.
- Stance: supportive of users’ ability to register their work
- Attitude: practical
- Evidence:
- “I have not had a problem registering any of my Suno songs. They do not match any other song's fingerprint”
- Explanation: Evidence from experience concerning content registration/fingerprinting.

waveforger
- Idea: Asks whether paid subscribers may legally submit songs to Spotify and make money.
- Stance: cautious
- Attitude: concerned
- Evidence:
- “For premiere subscribers, is it legally allowed to submit songs to spotify and make money? Should there be any copyright problems?”
- Explanation: Explicit legal/monetization question.

rjkmelb
- Idea: Answers that Spotify distribution should be fine but warns distributors may reject content if it resembles other songs.
- Stance: supportive with caution
- Attitude: practical
- Evidence:
- “yes you can and no there should not be problems”
- Explanation: Clear practical answer on distribution.
- “some distributors use aggressive content ID on submissions so if your song contains an element that sounds like another song then it may be rejected”
- Explanation: Adds a legal/platform-risk caveat.

douglasbubbletrousers01
- Idea: Questions whether Suno’s terms mean users own music while Suno still gets broad rights.
- Stance: cautious / critical
- Attitude: uncertain
- Evidence:
- “So you own the music, but Suno has the right to do anything they want with it?”
- Explanation: Direct legal concern about the scope of rights in the terms.
- Long TOS excerpt beginning “You grant to Suno...”
- Explanation: Grounds the concern in quoted terms rather than speculation.

alikan
- Idea: Warns about revealing privately shared information and insists some users are nice, but also comments on copying and reuse in musical learning.
- Stance: mixed
- Attitude: guarded
- Evidence:
- “I'm not going to reveal privately shared information that's not mine to give”
- Explanation: Shows caution around legality/ethics of sharing information.
- “To reuse myself one day.”

- Explanation: Shows acceptance of learning/reusing structure, but not enough by itself for stronger legal inference.

Suno Team Response

furrybeans [Suno Team]
- Summary: Confirms that paid subscription ownership applies and that free vs paid changes rights.
- Evidence:
- “Paid subscription just gives you ownership of what you create”
- Explanation: Clear statement on rights attached to paid plans.
- “The license applies to the song at its point of creation”
- Explanation: Clarifies that a song created while subscribed remains covered even after unsubscribing.

Additional Evidence (Optional)

“Sub account. Songs belong to you only”
Explanation: Community answer reinforcing the paid-plan ownership interpretation, though the stronger authority is the team reply above.

Topic: Circumventing or Testing Content Restrictions / Moderation Filters

Description

Another ethical/legal tension concerns users testing the boundaries of moderation filters: trying copyrighted lyrics, explicit content, or edge-case phrasing and then discussing how to evade or understand the filters. The tension is between user experimentation and platform moderation.

Timeline

- **2024-06-04 22:23:53–12:29:50**
- **2024-06-05 01:03:29–01:04:42**
- **2024-06-06 12:27:58–12:31:47**
- **2024-06-07 19:14:15–19:15:40**
- **2024-06-08 04:16:18–04:18:08**
- **2024-06-08 16:58:35–17:00:36**

How the discussion evolved
- stararmy’s “Using copyrighted lyrics is against Suno’s TOS” establishes a boundary.
- Later, furrybeans explicitly stops a user over “Explicit” content in a PG-13 server context.
- Users discuss getting blocked by front-page moderation despite “appropriate” content, complain about not knowing what triggered the filter, and speculate about AI moderation sensitivity.
- Some users describe circumventing censorship with alternative spellings or “creative” wording.
- Moderators remind people that the server is PG-13 and remove content.

Key Participants

stararmy
- Idea: Copyrighted lyrics violate TOS.
- Stance: critical of prohibited use
- Attitude: direct
- Evidence:
- “Using copyrighted lyrics is against Suno's TOS”
- Explanation: Sets the moderation/legal boundary clearly.

furrybeans [Suno Team]
- Idea: Enforces server rules and clarifies they are PG-13.
- Stance: corrective
- Attitude: firm
- Evidence:
- “'Explicit'? Are you familiar with the server rules?”
- Explanation: Direct intervention over disallowed explicit content.

derpy_76
- Idea: Complies after being corrected, but notes they had tried to stay under a limit.
- Stance: neutral / compliant
- Attitude: sheepish
- Evidence:
- “k lol ill take it down then...”
- Explanation: Shows content moderation enforcement in action.
- “To be fair, I did limit to under 10”
- Explanation: Suggests they were trying to interpret the rule leniently.

paulkemp21
- Idea: Complains that moderation rejects lyrics he thought were toned down, and wants clarity on triggers.
- Stance: critical
- Attitude: frustrated, confused
- Evidence:
- “What in the world is trieggering a filter for this heavily toned down song”
- Explanation: Direct complaint that moderation is hard to understand.
- “It'd be nice if it were at least a little more clear”
- Explanation: Explicit request for transparency.

the1slur
- Idea: Dismisses complaints by saying corporations won’t allow swear words.
- Stance: supportive of restrictive moderation
- Attitude: blunt, cynical
- Evidence:
- “imagine thinking a corporation will let you say the fuck word”
- Explanation: Frames moderation as unsurprising and normal.

Suno Team Response

patsuno [Suno Team]
- Summary: Explains that front-page filtering is less about explicitness alone and more about whether content is suitable to showcase, while noting the filter is a temporary stopgap.
- Evidence:

- “the filter isn't really 'explicitness' per se, it's more of a 'do we want to showcase this on our front page' issue.”
- “it's a temporary stopgap that we're looking forward to revising”
- Explanation: This is the clearest staff explanation of the front-page moderation logic.

Additional Evidence (Optional)

“i know i can get some of the stuff in with obfuscation”
Explanation: Shows users thinking in terms of working around moderation, which is part of the tension, though many such lines are fragmentary and not all are clearly tied to a single user intent.

Topic: Payment Access and Fairness of Pricing/Payment Methods

Description

There is a smaller but persistent contention around who can pay, how they can pay, and whether pricing is fair. This overlaps with fairness and access rather than direct copyright, but it is still a legal/commercial issue around service access.

Timeline

- **2024-06-04 11:39:32–11:49:53**
- **2024-06-04 16:05:47–16:13:03**
- **2024-06-04 17:56:35–18:14:18**
- **2024-06-04 23:21:57–00:00:36**

How the discussion evolved
- Users ask if they can pay without a credit card; responses vary by country.
- Community members explain regional differences and workarounds like debit cards and Google Wallet.
- Later a dispute emerges where taminalina calls current pricing a “rip-off” due to low competition, while Suno team pushes back that prices are reasonable for the value.
- The conversation becomes a mild argument over whether “rip-off” is fair language versus normal market conditions.

Key Participants

fraytastic
- Idea: Wants payment methods other than credit card and says only card appears available.
- Stance: critical / constrained by payment options
- Attitude: frustrated but polite
- Evidence:
- “Is there a way to pay without a credit card?”
- Explanation: Starts the access problem.
- “Either I'm too incompetent, or when I click subscribe I only have the option to provide a credit card”
- Explanation: Shows the practical access issue.

3daizy
- Idea: Explains country-specific payment availability and offers workarounds via debit cards.
- Stance: neutral / helpful
- Attitude: practical
- Evidence:
- “ATM you can only pay with credit card, for the exception of USA and Germany.”
- Explanation: Clear summary of payment limitation.
- “Another option is Debit Cards.”
- Explanation: Offers workaround.

taminalina
- Idea: Calls pricing a rip-off caused by low competition.
- Stance: critical
- Attitude: provocative, frustrated
- Evidence:
- “I hope that there will soon be a lot of competition on the market so that this rip-off is over.”
- Explanation: Direct criticism of pricing ethics/value.
- “if both have high prices you mean its not effective?”
- Explanation: Continues arguing market-competition logic.

furrybeans [Suno Team]
- Idea: Pushes back that “rip-off” is inflammatory and says the current price is good value.
- Stance: supportive of current pricing
- Attitude: defensive but calm
- Evidence:
- “Why is it a 'rip-off'?”
- Explanation: Direct challenge to the complaint.
- “I think it's reasonably priced”
- Explanation: States team-side view.
- “it's a bit of an inflammatory remark to say the prices are a rip-off.”
- Explanation: Frames the language itself as contentious.

wetcircuit
- Idea: Challenges the user’s competition theory by asking if competitors are actually cheaper.
- Stance: supportive of current pricing / skeptical of the complaint
- Attitude: argumentative, analytical
- Evidence:
- “You seem to be implying Suno is the most expensive of them. Is that even true?”
- Explanation: Pushes the debate onto evidence.
- “I don't think you are actually connecting your 'theories' to your observations.”
- Explanation: Directly disputes the reasoning.

Suno Team Response

furrybeans [Suno Team]
- Summary: Defends current pricing as reasonable and tied to current/future capability.
- Evidence:
- “For what it does, right now, and what it's soon to be capable of doing, it's good value IMO.”
- Explanation: This is the clearest explicit team statement on pricing/value in the logs.

Additional Evidence (Optional)

“talking of conspiracies... respect to Tomm Droste that man is dedicated...”
Explanation: Not directly about pricing, but shows how quickly even commercial/access conversations drift into status and visibility dynamics on the platform.

Chunk 3: 2024-06-08 to 2024-06-11

Topic: Copyright / Terms Violations from Using Existing Songs or Lyrics

Description

A repeated source of tension concerned whether users could use copyrighted lyrics, covers, or recognizable existing songs with Suno, especially in custom mode and with newer audio-upload/remix capabilities. The discussion became contentious when users posted or discussed cover-style outputs and others objected on rules, legal, and ethical grounds. The conflict escalated from user-to-user correction into direct moderation and team intervention.

The logs show explicit disagreement over whether making or sharing such songs is acceptable. Some users argued that “legally you can cover a song,” while others emphasized that Suno’s rules prohibit copyrighted lyrics regardless of broader legal arguments. The issue also extended into concerns about future misuse of upload/remix features. A related thread involved concern about stolen songs and distributor/platform enforcement.

Timeline

- **2024-06-08 09:33:57–09:36:57**
- **2024-06-08 13:26:53–13:37:37**
- **2024-06-08 13:55:00–13:59:40**
- **2024-06-08 14:00:20–14:09:11**
- **2024-06-08 17:29:17–17:40:13**
- **2024-06-08 17:53:13–18:05:49**
- **2024-06-10 13:08:47–13:09:16**
- **2024-06-10 14:46:52–14:50:14**
- **2024-06-10 23:46:26–23:49:59**
- **2024-06-11 03:53:53–04:10:51**
- **2024-06-11 14:50:58–14:57:16**

How the discussion evolved over time
- Early on, a user asked how “Megalovania” could be recreated if “Suno doesn't recognize any artist,” which led to responses about copyrighted music and non-commercial use: “technically we shouldnt use copyrighted music”.
- Later, the new audio-upload/sound-to-song feature intensified concern because users could use existing songs more directly. Some users celebrated the capability while others immediately raised “copyright issues”.
- The sharpest conflict came when a user posted an AI cover using copyrighted lyrics. Other users pushed back, and Suno team members explicitly cited the Custom Mode agreement and ordered removal: “Please remove your cover song posts.”

- The discussion broadened into theft and distribution: users reported songs being re-uploaded to YouTube/Spotify by others, complained about weak enforcement, and discussed DMCA and distribution strategies.
- Later, users again questioned whether game music, character-related works, or other recognizable material were acceptable, and others warned against posting copyrighted material in this Discord.
- By the end, the issue remained unresolved in principle, but the logs show a stable norm: users repeatedly warn others not to post copyrighted content here, and Suno team reiterates that the user is responsible and that the platform's terms prohibit copyrighted lyrics.

Key Participants

drakolyr
- Idea: Repeatedly warns that copyrighted music should not be used in Suno, especially for uploaded/remixed content, while allowing that some creators may permit non-commercial use outside Suno rules.
- Stance: critical
- Attitude: cautionary, firm
- Evidence:
- "technically we shouldnt use copyrighted music"
- Explanation: Directly states a rule-based objection to using copyrighted music.
- "you know you need a licence to cover Song, technically?"
- Explanation: Frames covers as requiring permission/licensing.
- "You litterly click a message, the first time using suno, to NOT using copyrighted lyrics"
- Explanation: Grounds the objection in Suno's own user flow and rules.
- "Well i report such songs, possibility that it gets removed."
- Explanation: Shows active enforcement-oriented behavior, not just opinion.

shadow_z987
- Idea: Raises the initial question about how a known copyrighted song was recreated.
- Stance: neutral
- Attitude: inquisitive
- Evidence:
- "if Suno doesn't recognize any artist, then how did a user recreate the song 'Megalovania' from Undertale?"
- Explanation: Introduces the copyright/recreation issue without arguing a side.

vznilla / viperstrikersf5
- Idea: Defends or normalizes cover use, suggesting if Suno allows it then it may be fine, and later minimizing risk by saying it is "for personal use".
- Stance: supportive
- Attitude: dismissive, casual
- Evidence:
- "If it was cooyright suno wouldnt allow it tho"
- Explanation: Suggests platform allowance implies acceptability.
- "Its for personal use tho"
- Explanation: Attempts to narrow the issue by minimizing intended use.

zara4527
- Idea: Distinguishes between legal cover rights generally and Suno's stricter rules.
- Stance: neutral
- Attitude: clarifying
- Evidence:

- "legally you can cover a song without permission"
- Explanation: Introduces a legal distinction separate from Suno policy.
- "You just need to pay royalties"
- Explanation: Adds a qualification to that legal point.
- "I just meant legally you can just suno does not allow it"
- Explanation: Clearly separates legal possibility from platform rules.

gamezbrown
- Idea: Emphasizes that platform ToS matters more than abstract legality in this server context.
- Stance: critical
- Attitude: matter-of-fact
- Evidence:
- "the legality doesn't really matter because its against TOS"
- Explanation: Refocuses the argument on Suno's rules rather than broader legal debate.

alliecat4
- Idea: Argues users should avoid covers/copyright violations because it could create legal blowback for Suno and the whole community.
- Stance: critical
- Attitude: concerned, admonishing
- Evidence:
- "The main reason you shouldn't do it is because if Suno gets sued because some Doofus cover of Eye of the Tiger goes viral, we will all pay the price"
- Explanation: Moves the discussion from individual behavior to collective consequences.
- "So just don't"
- Explanation: Clear prescriptive stance against the practice.

iicaptain73
- Idea: Criticizes users who violate terms and then blame AI tools; also reports actual theft of their own Suno song by others on Spotify/YouTube.
- Stance: critical
- Attitude: frustrated, admonishing
- Evidence:
- "Every piece of audio they used breached the terms of service... then they questioned the ethics of the application and not their own ethics"
- Explanation: Explicit criticism of hypocrisy around AI/music ethics.
- "2 months later i am still fighting with Spotify to take down a channel which uploaded my song"
- Explanation: Shows real-world harm from unauthorized reuse.
- "others had already uploaded my song to Youtube as their own within 24 hrs."
- Explanation: Reinforces the theft/distribution risk around AI music.

rjkmelb
- Idea: Suggests formal DMCA/legal routes when songs are stolen.
- Stance: critical
- Attitude: practical
- Evidence:
- "have you sent a DMCA?"
- Explanation: Pushes toward formal copyright enforcement.
- "send a physical DMCA notice either by fax or express post"
- Explanation: Gives concrete escalation advice.

wetcircuit

- Idea: Warns that recreating copyrighted material can cause copyright issues for whoever publishes it, and later mocks simplistic assumptions about permissions/disclaimers.
- Stance: critical
- Attitude: cautionary, sarcastic
- Evidence:
- "yes, it could lead to copyright issues. ... ■ for the person publishing it."
- Explanation: Clear warning about publishing consequences.
- "I always chuckle when I see some music someone uploaded to YouTube with the description containing the text 'No copyright intended'."
- Explanation: Reinforces skepticism toward naïve copyright disclaimers.

.derbaum.
- Idea: Repeatedly pushes proper crediting and repeatedly warns users not to post copyrighted material here.
- Stance: critical
- Attitude: corrective, firm
- Evidence:
- "do you know that you have to give credit when using megalovania?"
- Explanation: Pushes attribution/compliance.
- "it would be a shame if you get yourself in trouble with awesome songs like this."
- Explanation: Concerned corrective advice.
- "you still have not deleted your copyright violations."
- Explanation: Directly confronts a user over continued rule-breaking.
- "dont post your email in public @Alfgw1972.....we know the microsoft login is down. sorry for the small wait"
- Explanation: Not copyright-related itself, but shows moderator-like corrective tone consistent with other interventions.

Suno Team Response

furrybeans [Suno Team]
- Reiterates that users agreed not to use copyrighted lyrics when enabling Custom Mode and explicitly asks a user to remove cover-song posts.
- States that permission is still required for remixes/covers.
- Evidence:
- "Still need permission to do this though"
- Explanation: Direct statement that permission remains necessary.
- "Please remove your cover song posts."
- Explanation: Explicit moderation request in response to a copyright-violating cover.
- "you will have agreed not to use copyrighted lyrics - this happens when you first enable 'Custom Mode' in Suno."
- Explanation: Anchors enforcement in the product’s terms and workflow.

build.a.better.world
- Redirects users to Suno terms and clarifies monetization limits.
- Evidence:
- "Here are the specifics <https://suno.com/terms>.... you cannot monetize"
- Explanation: Refers users to formal policy rather than debating in chat.

Additional Evidence (Optional)

"you can also make music with suno wich you cant post here. .. same thing."

Explanation: Shows community norm-setting that some outputs may be technically possible but still not acceptable to post in this Discord.

Topic: Song Theft / Unauthorized Reuploads on YouTube and Spotify

Description

A second major ethical/legal tension concerns unauthorized reposting of users' Suno songs on platforms like YouTube and Spotify. Users complain that songs are being stolen, uploaded under others' names, and that enforcement by distributors/platforms is inconsistent and frustrating. The conflict is not primarily between users, but between creators' expectations and what platforms/distributors actually do.

Timeline

- **2024-06-08 14:00:20–14:09:11**
- **2024-06-08 14:11:47–14:17:30**
- **2024-06-08 14:20:43–14:26:18**
- **2024-06-08 23:45:28–23:49:30**

How the discussion evolved over time
- A user reports Spotify taking a long time to remove a stolen Suno song.
- Others suggest DMCA, Content ID, DistroLock, and uploading via distributors before publishing publicly.
- Multiple users mention thieves reposting songs from Discord or from trending.
- The discussion evolves into defensive practices: distributing early, using DistroLock, Content ID, and watermark-like attribution habits.

Key Participants

iicaptain73
- Idea: Their song was stolen and uploaded by others, and Spotify support was frustrating and unhelpful.
- Stance: critical
- Attitude: frustrated
- Evidence:
- "2 months later i am still fighting with Spotify to take down a channel which uploaded my song"
- Explanation: Clear complaint about unauthorized use.
- "they completely ignored that in favour of the thief."
- Explanation: Shows anger toward platform handling.
- "others had already uploaded my song to Youtube as their own within 24 hrs."
- Explanation: Demonstrates speed and scale of theft.

wetcircuit
- Idea: They also had a song stolen and discuss DistroLock and publishing strategies.
- Stance: critical

- Attitude: pragmatic, resigned
- Evidence:
- "I had one stolen from the discord... probably by one of the people I was chatting with."
- Explanation: Direct theft allegation from within the community context.
- "it should prevent new uploads..."
- Explanation: Describes hoped-for defensive mechanisms.

bornagainpenguin
- Idea: Theft concerns motivate use of DistroLock.
- Stance: critical
- Attitude: concerned
- Evidence:
- "This is why I am now starting on DistroLock."
- Explanation: A direct response to theft concerns.

Deleted User
- Idea: Reports own music being stolen and distributed by others; discusses contacting Fuga directly.
- Stance: critical
- Attitude: frustrated, matter-of-fact
- Evidence:
- "It was a user that was stealing my music and distributing it with another distributor"
- Explanation: Explicit report of unauthorized distribution.
- "I've encountered three so far that have distributed my music on streaming, and countless that repost my songs on YouTube"
- Explanation: Shows repeated pattern, not isolated incident.

great_paimon
- Idea: Advises protective steps before publishing publicly.
- Stance: critical
- Attitude: practical, detailed
- Evidence:
- "What people should do before changing their song setting to Public... is to set up some safeguard"
- Explanation: Proposes preventative strategy.
- "Upload a generation of the video to your YouTube account... for evidence"
- Explanation: Specific defensive tactic.
- "Have the song registered with the Content ID systems"
- Explanation: Adds platform protection steps.

Suno Team Response

No response from Suno team in the logs

Additional Evidence (Optional)

"I don't make any Suno tracks public now that i think are good."
Explanation: Shows how theft risk changes user behavior and discourages public sharing.

Topic: Trending System Fairness, Manipulation, and Filtering

Description

The most repeated friction in these logs concerns how Suno's trending system works, whether it is fair, whether it is easily manipulated, and whether moderation/filtering is inconsistent. This is directly tied to ethical/platform governance concerns: users accuse others of gaming rankings, complain about dislikes/downvotes, and criticize apparently inconsistent moderation of song titles/lyrics.

Tension appears in several forms:
- users insulting or mocking each other over what trends,
- complaints about "dislike bombing,"
- explicit accusations that Suno's system is badly managed,
- later, organized trolling/manipulation around "white van" songs.

Timeline

- **2024-06-08 07:17:17–07:19:19**
- **2024-06-08 10:21:22–10:35:42**
- **2024-06-08 14:53:57–16:20:48**
- **2024-06-08 22:37:02–22:46:53**
- **2024-06-09 07:17:08–07:19:17**
- **2024-06-10 22:41:47–23:00:03**
- **2024-06-11 08:56:53–09:19:29**
- **2024-06-11 12:44:42–12:46:53**

How the discussion evolved over time
- On June 8, users criticize suggestion management and moderation tools more broadly, e.g. "bad managing by Suno Team."
- Later on June 8, users investigate why playlists disappear from trending and conclude filtering and playlist-publicity rules are unclear.
- Team members clarify some mechanics, admit an update description was wrong/incomplete, and acknowledge vagueness.
- By June 10–11, the issue intensifies around the redesigned trending algorithm. Users note weird rankings, songs with few plays/likes appearing high, and repeated "white van" songs taking over trending.
- A prank/escalation by users intentionally boosting "white van" songs creates visible disruption. Users then argue about whether this was harmless fun or harmful manipulation.
- Suno team responds that trending is being reweighted, is experimental, and that users boosting the glitch made things worse. Moderation hardens in reaction.

Key Participants

0346.
- Idea: Criticizes Suno's suggestion/management setup as poorly organized and under-resourced given funding.
- Stance: critical
- Attitude: blunt, contemptuous
- Evidence:
- "Just bad managing by Suno Team."
- Explanation: Direct complaint about team/platform governance.
- "125m funding and they can't even set up thread"

- Explanation: Strong criticism of moderation/information architecture.

shiroken
- Idea: Criticizes lack of basic anti-spam moderation and later repeatedly questions filtering/trending outcomes.
- Stance: critical
- Attitude: frustrated
- Evidence:
- "cant install a free discord bot to block spam, fishing links"
- Explanation: Complaint about basic moderation tooling.
- "How can a song with 3 likes be on trending, but your song with 10 or more likes... doesn't even show."
- Explanation: Explicit fairness complaint.

privateriem
- Idea: Challenges rude explanations and later repeatedly complains about platform inconsistency and output quality.
- Stance: critical
- Attitude: frustrated
- Evidence:
- "That's rude"
- Explanation: Pushback against aggressive behavior in discussion about platform capability.
- "Seems limited"
- Explanation: Initial criticism that sparked one conflict.
- "This is crazy frustrating"
- Explanation: Strong frustration with repeated issues and platform behavior.

drakolyr
- Idea: Repeatedly investigates trending/filter logic, runs tests with playlists, and later criticizes users for being jealous or overfixated on rankings while still engaging heavily in ranking mechanics.
- Stance: critical
- Attitude: analytical, sometimes exasperated
- Evidence:
- "We can all humans after all"
- Explanation: Softens some criticism around mistakes/ambiguity.
- "The Trending is kinda weird"
- Explanation: Ongoing concern about algorithm behavior.
- "90% of you i read, is renting about other Songs and be jealous as hell."
- Explanation: Criticizes community reaction to rankings.
- "They pushed an update which should reduce the effect of Downvotes"
- Explanation: Shows ongoing monitoring of the system.

joshuasodil
- Idea: Discusses contest/trending mechanics closely and later mocks or criticizes the broken trending page.
- Stance: critical
- Attitude: sarcastic, engaged
- Evidence:
- "Trending is just a wild west now lmao"
- Explanation: Summarizes perceived chaos after algorithm changes.
- "20 likes to hit top 6 now is WILDDDDDDD"
- Explanation: Highlights how strange the ranking became.
- "Can we get 50 of 50 trending to be DJ and White Van's guys?????"

- Explanation: Sarcastically underscores how broken the page seemed.

around_once
- Idea: Repeatedly points out weird trending behavior and the rise/fall of songs that make no sense under the apparent rules.
- Stance: critical
- Attitude: incredulous, frustrated
- Evidence:
- "something is going on"
- Explanation: Signals suspicion about unexplained ranking movement.
- "Trending now page is a little ■ now"
- Explanation: Open complaint after update.
- "This is now Suno Armageddon"
- Explanation: Hyperbolic reaction to trending chaos.

sushileafbeats
- Idea: Strongly criticizes the logic of trending and later criticizes users for making things worse through manipulation, while also actively tracking the page.
- Stance: critical
- Attitude: frustrated, sarcastic
- Evidence:
- "1 play and 1 like doesn't = trending in my mind."
- Explanation: Direct fairness critique.
- "OMG LOOK AT ALL THAT ACTIVITY, how trendy!"
- Explanation: Sarcastic attack on weakly-performing songs ranking high.
- "y'all boosted a glitch for hilarity and fucked over everyone else."
- Explanation: Explicit complaint about user manipulation harming others.

white-van related users / prank participants
- Idea: Intentionally or semi-intentionally boost “white van” songs to exploit or expose trending weirdness.
- Stance: supportive of manipulation / critical of system
- Attitude: joking, provocative
- Evidence:
- "Just went and liked all their recent tracks ■"
- Explanation: Describes active boosting.
- "The White Vans playlist grows!"
- Explanation: Organizing around the manipulated meme trend.
- "Guy white van had 10 songs trending with 2 likes"
- Explanation: Shows awareness of exploitative behavior.

Suno Team Response

patsuno [Suno Team]
- Acknowledges ongoing updates and warns users not to overinterpret trending changes.
- States the trending algorithm is being reweighted toward “harder to fake” signals and that the system is experimental.
- Pushes back strongly against users who intentionally exploited glitches and says timeouts will escalate.
- Evidence:
- "there's going to be a little bit of froth on the trending page today"
- Explanation: Confirms live changes affecting trending.

- "we're reweighting the trending algorithm to make more attentive to less manipulable signals."
- Explanation: Direct statement of team intent.
- "please don't freak out."
- Explanation: Explicit attempt to calm user speculation.
- "I have to say that even with full access to the logs it's not always easy to tell whether certain kinds of abuse are actually happening or not"
- Explanation: Admits uncertainty while acknowledging abuse concerns.
- "DO NOT TRY TO GASLIGHT THAT YOUR BEHAVIOR DID NOT MAKE IT WORSE."
- Explanation: Strong condemnation of users boosting glitch content.
- "I will be handing out day time outs"
- Explanation: Signals stricter moderation response.

furrybeans [Suno Team]
- Explains or reinforces rules around playlists, experimentation, and later the use of dislikes for training/EA.
- Evidence:
- "playlists can contain unlisted songs... a public playlist will not show on Suno homepage with unlisted songs in it..."
- Explanation: Clarifies playlist logic amid confusion.
- "The audio quality does need to be improved"
- Explanation: Not directly trending, but shows team acknowledging broader model issues that feed community complaints.

wetcircuit
- Although not marked Suno Team in the logs, acts in a moderator/guiding capacity and strongly rebukes prank manipulation.
- Evidence:
- "you do not get shadow banned. the song should NOT appear on trending."
- Explanation: Clarifies one mechanism.
- "y'all boosted a glitch for hilarity and fucked over everyone else."
- Explanation: Condemns exploitative user behavior.

Additional Evidence (Optional)

"if the people here do not love it haha"
Explanation: Shows that users themselves tie Discord social dynamics to visibility/trending outcomes, reinforcing how community-driven and emotionally charged the ranking system is.

Chunk 4: 2024-06-11 to 2024-06-15

Topic: Using Copyrighted Lyrics or Existing Songs in Suno

Description

A recurring point of tension concerns whether users may input lyrics from existing songs, remake known songs, or use uploaded copyrighted audio in Suno. The discussion centers on terms of service, copyright, and whether “private” or non-monetized use is acceptable. The thread begins with a user saying they want to “experiment with using lyrics to actual songs,” which immediately prompts warnings

and corrections from others. Several users state this is against the TOS regardless of monetization, while some users initially minimize the issue before acknowledging the rule. Later, related discussion broadens into using songs “in the style of” other works, cover/parody questions, and the later-added audio upload feature, where people ask whether uploading copyrighted songs, recordings, or samples is allowed.

The discussion evolves from quick peer correction about lyrics, to a more extended legal/TOS discussion about remixing or reproducing melodies/styles, and then later to direct concern about the upload-audio feature enabling copyright abuse. Participants repeatedly emphasize that copyrighted lyrics and songs are not allowed, and Suno team members explicitly confirm at least one principle: if you are earning money from it, it is commercial.

Timeline

- **2024-06-11 16:18:52–16:29:50**
- **2024-06-11 17:57:15–18:16:15**
- **2024-06-11 19:09:41–19:33:15**
- **2024-06-11 21:14:05–21:22:08**
- **2024-06-12 01:25:57–01:28:09**
- **2024-06-14 16:49:41–17:01:11**
- **2024-06-14 20:58:14–21:03:22**
- **2024-06-14 23:02:30–23:17:06**

Summary of evolution over time
- The topic first appears when a user proposes testing “lyrics to actual songs,” which triggers immediate warnings that this is against TOS.
- The discussion then expands into adjacent cases: covers, parodies, “same style” recreations, instrumental transformations, and celebrity/artist voice concerns.
- Later, people ask practical copyright questions about monetization, Spotify/YouTube use, and whether previously free-created songs can become commercial after subscribing.
- Once audio upload launches, the discussion becomes sharper: users worry about uploading copyrighted songs or samples, and others warn that the feature could be “a copyright nightmare.”
- Suno team confirms at least the commercial-use boundary directly, while community members continue enforcing the broader “don’t upload/use copyrighted material you don’t own” norm.

Key Participants

werto9518
- Idea: Wants to test using lyrics from actual songs and initially assumes non-monetized use may be acceptable.
- Stance: neutral to permissive initially, then accepts the correction.
- Attitude: curious, then receptive.
- Evidence:
- "I want to experiment with using lyrics to actual songs, and see how suno reacts"
- Explanation: This directly introduces the copyright/TOS issue around existing-song lyrics.
- "Should be fine as long as I dont monetize it"
- Explanation: Shows the initial mistaken assumption that monetization is the deciding factor.
- "Thanks for the info. :)"
- Explanation: Indicates the user accepts the pushback and correction.

epicx
- Idea: Warns that actual-song lyrics likely violate TOS unless properly licensed.

- Stance: critical
- Attitude: cautious
- Evidence:
- "careful, against the TOS there unless the lyrics have the correct copyright license - i am not a lawyer, just my best guess"
- Explanation: This is one of the first direct warnings linking existing-song lyrics to TOS and copyright licensing.

alliecat4
- Idea: States clearly that copyrighted lyrics are against TOS whether monetized or not.
- Stance: critical
- Attitude: firm
- Evidence:
- "It’s against TOS whether you monetize it or not"
- Explanation: Directly rebuts the idea that non-monetized use is allowed.
- "You literally had to click a button saying you wouldn’t do that"
- Explanation: Reinforces that the rule is explicit, not ambiguous.

kakermix
- Idea: Strongly opposes use of actual lyrics and warns against trying to skirt the rules.
- Stance: critical
- Attitude: admonishing, firm
- Evidence:
- "Do not use lyrics from actual songs, that's explicitly against the TOS and very much looked down on"
- Explanation: Clear statement of both formal rule and community norm.
- "We all know what Suno means by "don't abuse this""
- Explanation: Frames attempts to push the limit as abuse.
- "if you are trying to toe the line then you are already in a bad look"
- Explanation: Shows criticism of borderline behavior, not just explicit infringement.

shiroken
- Idea: Repeatedly says covers/parodies are not allowed on Suno and that using others’ music/voices can expose the user to legal risk.
- Stance: critical
- Attitude: blunt, cautionary
- Evidence:
- "I mean you cant do that with any ai it would be sued to hell"
- Explanation: Strongly frames song-to-style recreation as legally dangerous.
- "Not on suno, its against the TOS, even covers are not allowed or parodies"
- Explanation: Explicitly ties the issue to Suno’s rules.
- "You could just take any song and swap the vocals with ai... However you will get sued if an artist dislikes what you have done."
- Explanation: Continues the warning, extending it to voice/modeling scenarios.

frowns_78143
- Idea: Argues that using another person’s intellectual property without permission is not protected by vague “fair use” claims.
- Stance: critical
- Attitude: assertive, didactic
- Evidence:
- "you cannot use another person's property (intellectual or not) without their explicit permission."
- Explanation: Summarizes a strict anti-infringement position.
- "fair use has only held up in court a couple times"

- Explanation: Pushes back on casual appeals to fair use.
- "the judge will send you straight to jail. however if you're excuse is ... there was no other feasible solution to preserve life then you have a case of fair use"
- Explanation: Uses analogy to argue that transformative/remix claims are weak.

hellointernet.lol
- Idea: Sometimes suggests workarounds, but also engages in flippant or mocking ways around copyright constraints.
- Stance: mixed / permissive
- Attitude: joking, provocative
- Evidence:
- "just have chatgpt rewrite the lyrics lol"
- Explanation: Suggests a workaround rather than direct compliance.
- "If I dont steal this song, i will die."
- Explanation: Sarcastically mocks the fair use argument being discussed.
- "I want to know EXACTLY what goes too far"
- Explanation: Shows interest in locating the boundary of allowable content rather than avoiding the issue entirely.

bornagainpenguin
- Idea: Emphasizes that clever workarounds do not bypass ownership rules and warns against trying to “hack the system.”
- Stance: critical
- Attitude: cautionary, slightly mocking
- Evidence:
- "This is not D-n-D. Clever workarounds do not actually work here."
- Explanation: Rejects the idea that users can loophole their way around rules.
- "you'd be surprised at how many people think they can play games and somehow "hack the system" to get stuff for free."
- Explanation: Frames this behavior as common but misguided.

the_chosenone
- Idea: Wants to transform an existing song/instrumental into another style and asks for ways to make it happen.
- Stance: permissive
- Attitude: persistent
- Evidence:
- "I need an AI that makes takes one song and converts it into style of another one."
- Explanation: Introduces the later thread about style-transfer of copyrighted works.
- "Then, maybe, You have heard about some ways to make it happen?.."
- Explanation: Shows continued interest even after being told it is against TOS.

tigonn
- Idea: Warns against uploading/using copyrighted material and says doing so invites lawsuits.
- Stance: critical
- Attitude: blunt, slightly sarcastic
- Evidence:
- "again if you wanna get sued go for it, but we don't recommend luring the shark to you... lol."
- Explanation: Clear warning against knowingly stepping into copyright trouble.
- "using copyrighted lyrics mate is a quick way to get sued, don't do it."
- Explanation: Reiterates the warning in direct terms.

Suno Team Response

furrybeans [Suno Team]
- Confirms that monetized use counts as commercial.
- Reinforces that users are responsible for what they upload/use and references the warning users see.
- Evidence:
- "If you're earning from it, that's commercial."
- Explanation: Direct Suno team clarification on the commercial-use boundary.
- "Pretty sure this covers it? (Last revised in January)"
- Explanation: Indicates reliance on existing terms rather than a new exception.
- "The message you see is basically just a reminder"
- Explanation: Suggests the upload-warning flow is intentional and tied to user responsibility.

Additional Evidence (Optional)

"Not on suno, its against the TOS, even covers are not allowed or parodies"
Explanation:
This shows the conflict broadened from “lyrics from actual songs” to a wider concern around covers, parodies, and style recreation.

"Things that we where missing in V3 / V3.5 ... 1) Kazoo 2) Bike / Clown Honky Horn"
Explanation:
Not enough evidence in the logs that this is tied to copyright or ethics; it is more feature discussion, so it does not define the contention topic.

Topic: Commercial Rights, Ownership, and Licensing of AI-Generated Songs

Description

A second major contention concerns who owns songs made with Suno, what rights free vs paid users have, and whether songs made before subscribing can later be monetized. The tension comes from conflicting or incomplete user understandings, followed by corrections from others. Users ask whether they can use songs for YouTube intros, Spotify uploads, and monetized content, and whether older free-tier songs can become commercially usable after upgrading. The discussion includes disagreement about subscription rights, multiple clarifications that only songs created during a paid subscription are commercially usable, and concern about distributor requirements for proof of licensing.

This topic is ethically and legally relevant because it concerns ownership, licensing, and commercial rights over AI-generated works. It also intersects with platform policy and downstream distribution.

Timeline

- **2024-06-11 15:45:48–15:54:20**
- **2024-06-11 17:19:14–17:24:19**
- **2024-06-11 19:11:41–19:33:15**
- **2024-06-11 21:14:05–21:22:08**

- **2024-06-13 14:23:46–14:29:31**
- **2024-06-14 14:23:56–14:30:00**

Summary of evolution over time
- First, new users ask if they can use free-made songs on YouTube intros or monetized content.
- Community members explain the paid/free split, but there is some temporary confusion over whether paid tiers differ in license.
- Later, users ask whether subscribing after making songs on the free plan transfers rights; several participants say no, though one mentions a support exception.
- The issue then continues into distributor questions: TuneCore and others asking for proof or flagging releases as derivative works.
- Community responses shift from general explanation to practical advice: use paid plans, remake songs under paid status, show TOS, or contact support.

Key Participants

cookiecat0001
- Idea: Asks whether free-created songs are unique and whether they can be used for YouTube intros or commercially after subscribing.
- Stance: neutral
- Attitude: curious, surprised
- Evidence:
- "so what i creted is unique?"
- Explanation: Starts the ownership/uniqueness question.
- "so what if i wanted to use it on my intro of youtube for example?"
- Explanation: Moves the discussion toward practical licensing use.
- "if i subed now do i get the songs i just made?"
- Explanation: Raises the specific “retroactive rights” issue.

kakermix
- Idea: Explains that monetization requires a paid subscription and that paid creations are yours.
- Stance: neutral
- Attitude: matter-of-fact
- Evidence:
- "If it's monestized you must be a paying subscriber. If you are a paying subscriber the music you generate is 100% yours free and clear to do with what you want."
- Explanation: Direct summary of the paid-tier rule.
- "It's easy: If paid = then yours"
- Explanation: Simplifies the ownership rule.

frosty_career100
- Idea: Initially gives an incorrect impression that the two paid plans have different licensing, then acknowledges being wrong.
- Stance: mixed / corrective
- Attitude: uncertain, self-correcting
- Evidence:
- "The two paid subscriptions provide two different levels of licensing."
- Explanation: Shows initial confusion contributing to the contention.
- "\"General\" and \"Commercial\" doesn't really sound same-ish to me."
- Explanation: Explicitly challenges another user’s interpretation.
- "Well, either way, looks like I was wrong."
- Explanation: Acknowledges correction after others clarify.

.derbaum.
- Idea: Clarifies that both paid plans have the same license and that free songs do not retroactively become paid songs.
- Stance: neutral
- Attitude: informative
- Evidence:
- "both paid plans have the same licenses attached"
- Explanation: Corrects confusion about plan differences.
- "you used a pen... bonus points for creativity"
- Explanation: Not relevant to this topic.
- "i would not count on getting the free songs transferred over into paid ones..."
- Explanation: Addresses retroactive rights directly.
- "they all have a date. if its before your sub... they were free"
- Explanation: Gives the practical rule for determining rights status.

onyxofborg
- Idea: States clearly that free-version songs never gain commercial rights later.
- Stance: neutral
- Attitude: direct
- Evidence:
- "If you made a song (or part of a song) on the free version, you never get the right to use it commercially."
- Explanation: Very explicit summary of the non-retroactive rule.

bornagainpenguin
- Idea: Repeatedly explains that free songs remain Suno's, though user-written lyrics remain the user's.
- Stance: neutral
- Attitude: explanatory, firm
- Evidence:
- "If you have *already* made the song with the free account the song remains the property of Suno."
- Explanation: Core statement of ownership policy.
- "You cannot redeem songs made with the free account."
- Explanation: Clarifies no retroactive conversion.
- "Your lyrics remain *your* lyrics."
- Explanation: Distinguishes lyrics ownership from song/performance ownership.
- "The whole song remains Suno's."
- Explanation: Applies the rule even to free-song extensions under paid plans.

codalite
- Idea: Says support gave a one-off exception to use two free songs under paid-like terms.
- Stance: neutral
- Attitude: casual, anecdotal
- Evidence:
- "I emailed support and they gave me permission to use two of my free songs as if they are under paid subscription and the email serves as proof lol"
- Explanation: Shows an exception claim, but presented as anecdotal, not general policy.

mtsart
- Idea: Wants to know if upgrading to pro allows monetized YouTube/Spotify use and whether old lyrics can be reused.
- Stance: neutral
- Attitude: practical, uncertain

- Evidence:
- "given I upgrade to pro plan am I able to use it in monetized content on youtube?"
- Explanation: Asks directly about commercial rights.
- "now would I be able to put it on spotify?"
- Explanation: Extends that question to distribution.
- "Now can I use the lyrics that are in the free version since they were mine to begin with?"
- Explanation: Raises the important distinction between lyric ownership and song ownership.

furrybeans [Suno Team]
- Idea: Confirms that if earnings are involved, it is commercial.
- Stance: neutral
- Attitude: concise
- Evidence:
- "If you're earning from it, that's commercial."
- Explanation: Explicit team statement on the commercial-use threshold.

Suno Team Response

furrybeans [Suno Team]
- Clarifies the meaning of “commercial” in monetization-related questions.
- Evidence:
- "If you're earning from it, that's commercial."
- Explanation: Confirms the key commercial-use rule from the team.

Additional Evidence (Optional)

"You can't use it in that sort of way unless you have one of the two paid subscriptions."
Explanation:
Supports the distinction between free-tier and paid-tier usage rights.

"Only stuff made under subscription is yours. You don't have to delete but, you would have to re-create to monetize."
Explanation:
This reinforces the recurring conclusion that remake-under-paid is the path to commercial use.

Topic: Upload Audio Feature and Copyright / Abuse Risks

Description

When the new upload-audio feature appears, it quickly becomes a point of legal and ethical tension. Users are excited by its creative possibilities, but many immediately worry about misuse: uploading copyrighted songs, celebrity voices, existing tracks, or other people’s content. Others call it “a copyright nightmare.” The central contention is whether the feature can or should be used with copyrighted or externally sourced audio, what happens if the content is royalty-free or licensed, and whether Suno’s current filtering is sufficient.

The topic evolves from excitement about the feature to concrete warnings that users must only upload audio they own or have rights to. Community members repeatedly say that uploading others' content violates TOS even if the content is not monetized. The team emphasizes user responsibility and points to the warning shown at upload time.

Timeline

- **2024-06-11 17:28:04–17:31:15**
- **2024-06-13 10:29:00–10:35:19**
- **2024-06-14 16:45:46–16:50:54**
- **2024-06-14 16:57:56–17:03:22**
- **2024-06-14 17:16:04–17:19:20**
- **2024-06-14 20:58:14–21:03:22**
- **2024-06-15 00:17:51–00:23:40**

Summary of evolution over time
- Users first speculate about future sound-to-sound possibilities before the feature appears.
- Once upload launches, excitement mixes with immediate questions about copyrighted material and legal boundaries.
- Community members warn that trying to upload copyrighted songs or sampled material is dangerous and against TOS.
- Some users bring up edge cases like royalty-free sounds, Creative Commons files, or public domain recordings.
- The team and experienced users repeatedly return to the same core rule: if you don't own it or have rights, don't upload it.

Key Participants

the_chosenone
- Idea: Wants "one song converted into the style of another," effectively song-to-song transformation.
- Stance: permissive
- Attitude: inquisitive, persistent
- Evidence:
- "I need an AI that makes takes one song and converts it into style of another one."
- Explanation: Early articulation of the kind of behavior that later becomes a concern with upload tools.

.derbaum.
- Idea: Explains how upload works, warns that users are responsible, and says songs with uploaded voice samples cannot be made public.
- Stance: neutral
- Attitude: informative, cautionary
- Evidence:
- "you are responsible... if you get angry lawyer mails... then its your fault."
- Explanation: Puts liability on the user regarding uploads.
- "songs containing voice samples can not be switched public and are not usable on sunos internal pages like profile or trending."
- Explanation: Clear limitation tied to upload usage.
- "everything that has no copyright or you own it is ok."
- Explanation: Core practical rule for upload usage.

frowns_78143

- Idea: Warns that upload and reuse of copyrighted or protected material is not allowed and explains recording-vs-composition distinctions.
- Stance: critical
- Attitude: firm, technical
- Evidence:
- "if you did not make it yourself, you are probably not allowed to use it. there are exceptions of course, but this is a good rule of thumb to follow in life"
- Explanation: Broadly states the ownership standard for uploads.
- "the song/sample is fine"
- Explanation: In context, shows some uploads are okay when user-made.

sushileafbeats
- Idea: Clarifies that even for remixing, users need legal rights, and that uploaded voice-based songs cannot currently be made public.
- Stance: critical
- Attitude: explanatory
- Evidence:
- "you can just use audio you don't have the rights to."
- Explanation: Rejects the permissive view of remixing copyrighted uploads.
- "what suno will do is likely use the same instruments and melodies... but in doing this, you're still altering copywritten audio."
- Explanation: Explains why even transformed audio remains problematic.
- "if Suno thinks there is vocals in the sample, you cannot."
- Explanation: Clarifies current public/private behavior on uploaded voice material.

j3wp3w
- Idea: Wants to know whether uploaded tracks that are actually theirs can be shared publicly on Suno and worries about copyright false positives.
- Stance: neutral
- Attitude: frustrated, practical
- Evidence:
- "\"Unable to be made public due to content restrictions\" - the fuck is that?"
- Explanation: Reacts to the system blocking their own uploaded-audio song from public posting.
- "the track i've uploaded as a reference is actually yours, so you could also share link to the song on the Suno platform"
- Explanation: Wants a better mechanism for proving ownership and allowing public use.

kain_niak
- Idea: Reports that audio they personally released under Creative Commons is still blocked by copyright detection.
- Stance: critical of current detection
- Attitude: frustrated
- Evidence:
- "anything I have ever uploaded to my soundcloud can not be used in suno ..."
- Explanation: Shows friction between legitimate rights claims and the system’s upload restrictions.
- "100% of my music is released under creative commons"
- Explanation: Indicates the content is not necessarily infringing despite being blocked.

reitoken_ceo
- Idea: Wants to upload their own cover or reinterpretation to see if Suno can produce something similar, stressing it’s for testing not selling.
- Stance: permissive
- Attitude: exploratory

- Evidence:
- "if i play i piano cover, to use the song as seed to generate a new song"
- Explanation: Asks directly about a gray-area upload use case.
- "the purpose it's not to make money, but first place to see if suno is able to create something similar"
- Explanation: Tries to justify it as private experimentation.

furrybeans [Suno Team]
- Idea: Says upload is for things you own, highlights account-risk from fake sites, and notes that user responsibility is core.
- Stance: neutral / cautionary
- Attitude: direct, practical
- Evidence:
- "There are a few fake apps and websites that use Suno. I would not recommend logging into these, as you may be putting your accounts at risk."
- Explanation: Shows concern about misuse and external abuse around Suno features.
- "The message you see is basically just a reminder"
- Explanation: The upload warning is presented as intentional guidance, not optional.
- "You can do whatever you want with the content generated on a paid sub so I don't see why this would be an issue. It's only a problem if you start putting other peoples content in that you don't have rights to."
- Explanation: Direct team answer on using your own material with upload.
- "Pretty sure this covers it? (Last revised in January)"
- Explanation: Indicates current TOS already governs upload behavior.

Suno Team Response

furrybeans [Suno Team]
- Warns about fake sites using Suno.
- States that paid users can use their own generated content, but problems begin when uploading other people’s content without rights.
- Evidence:
- "There are a few fake apps and websites that use Suno. I would not recommend logging into these, as you may be putting your accounts at risk."
- "You can do whatever you want with the content generated on a paid sub so I don't see why this would be an issue. It's only a problem if you start putting other peoples content in that you don't have rights to."

Additional Evidence (Optional)

"Audio inputs is gonna be a copyright nightmare"
Explanation:
This concise line captures the overall anxiety some users feel about the upload feature’s abuse potential.

"If you are using more than one free account, do be aware that you are violating the Terms of Service."
Explanation:
Shows the team is attentive to misuse patterns around access and resource abuse, though this is adjacent rather than central to the upload-content issue.

Chunk 5: 2024-06-15 to 2024-06-18

Topic: Copyright, Plagiarism, and Uploading Protected Material

Description

Conflict appears around whether users should use copyrighted lyrics, samples, or uploaded audio derived from existing works in Suno. The tension is not just technical; it is explicitly framed as legal and rule-based. Early in the logs, one user jokes about copying Disney lyrics, and others immediately push back as “illegal” and “plagiarism.” Later, a longer dispute emerges when users discuss uploading copyrighted songs, covers, and samples, with repeated reminders that this violates Suno’s rules. The friction escalates when one user defends using copyrighted material by comparing it to YouTube covers, while other users and moderators insist that Suno’s Terms of Service forbid it regardless of outside norms.

The discussion evolves from casual reminders (“don’t do that”) into stricter rule-enforcement language. By 2024-06-18, moderators explicitly state that using copyrighted input breaks the ToS, that “the full responsibility is at the user,” and that violations can lead to account cancellation. There is also a related practical issue: users find it frustrating that even their own uploaded material may trigger restrictions, but moderators keep distinguishing between user frustration and the rule itself.

Timeline

- 2024-06-15 01:28:16 - 01:29:57
- 2024-06-15 05:18:50 - 05:22:04
- 2024-06-15 07:01:57 - 07:02:26
- 2024-06-15 10:07:15 - 10:39:37
- 2024-06-15 15:48:50 - 16:03:39
- 2024-06-16 01:07:51 - 01:18:47
- 2024-06-17 05:49:00 - 05:54:42
- 2024-06-17 15:47:08 - 15:55:42
- 2024-06-18 00:47:34 - 00:54:10
- 2024-06-18 01:11:47 - 01:17:48
- 2024-06-18 23:07:23 - 23:08:29

The topic starts with a small correction around copying Disney lyrics, then grows into wider disputes about distributors, covers, public domain material, uploaded samples, and enforcement. Over time, users move from debating what is “fair” or common online to explicitly citing Suno’s ToS and warning about bans or lawsuits.

Key Participants

shypa
- Idea: Suggests copying lyrics from famous Disney movies as a joke or idea for use in Suno.
- Stance: supportive of the prohibited use, though phrased humorously.
- Attitude: joking, provocative.
- Evidence:
- `"just copy lyrics of famous disney movies like arielle or frozen and use "death metal" as promt. omg , thats hilarious"`
- Explanation: This directly proposes using famous copyrighted lyrics.

alikan
- Idea: Repeatedly objects to using copyrighted lyrics/samples and frames it as against the rules and potentially harmful.
- Stance: critical.
- Attitude: firm, corrective.
- Evidence:
- `"and illegal"`
- Explanation: Directly labels the Disney-lyrics idea illegal.
- `"you literally agreed not to do that"`
- Explanation: Points to rule-based prohibition, not just personal dislike.
- `"report those songs ■"`
- Explanation: Advocates enforcement when copyrighted songs are uploaded.
- `"if its a copyright song - report it to suno"`
- Explanation: Pushes for reporting violations.
- `"if suno starts getting heat."`
- Explanation: Connects user violations to broader platform risk.

.zached_0ut
- Idea: Agrees that plagiarism is not acceptable.
- Stance: critical.
- Attitude: brief, matter-of-fact.
- Evidence:
- `"Yeah no plagiarism"`
- Explanation: Explicitly rejects the practice being discussed.

american_pride
- Idea: Describes having songs stolen and uploaded by others, and works through responses from YouTube/distributors.
- Stance: critical of theft and unauthorized reuse.
- Attitude: frustrated, angry.
- Evidence:
- `"crafty fuck uploaded it to a distributor passing it as his own work"`
- Explanation: Directly alleges theft and false ownership claim.
- `"fuck thieves man"`
- Explanation: Shows strong anger toward unauthorized reuse.
- `"I am going to nail this fuck to the wall"`
- Explanation: Escalated anger after trying to identify and pursue the infringer.

shiroken
- Idea: Encourages escalation against theft and proposes contacting distributors to remove stolen content.
- Stance: critical of infringement.
- Attitude: forceful, solution-oriented.
- Evidence:
- `"contact them, and have their entire account banned and all their content removed everywhere."`
- Explanation: Pushes for strong punitive action against an alleged thief.
- `"His distributor is IIP-DDS aka https://fuga.com/ , go to that website, contact support and provide proof he stole your song. They will yank everything."`
- Explanation: Provides concrete steps to enforce against infringement.

iicaptain73

- Idea: Warns users about distributors rejecting AI music and criticizes unclear or misleading distributor policies.
- Stance: critical.
- Attitude: frustrated, analytical.
- Evidence:
- `"TuneCore does not distribute any works that are or use 100% Generative AI"`
- Explanation: Provides quoted distributor policy showing friction over AI music distribution.
- `"Pretty sure they are just trying to cover their own * **but have no idea about ai music."**`**
- Explanation: Criticizes the distributor's understanding and handling of AI music.
- `"People learn the hard way about TuneCore rejecting AI music"`
- Explanation: Summarizes repeated community friction with the distributor.

realsemper
- Idea: Seeks a new publisher because their current publisher does not accept AI music and even challenges the transparency of that policy.
- Stance: critical.
- Attitude: frustrated, formal.
- Evidence:
- `"my publisher does not accept AI music so I am looking for a new one"`
- Explanation: States the core conflict clearly.
- `"I could not find any reference to this policy in the current Terms of Service of TuneCore."`
- Explanation: Challenges the legality/transparency of the policy.
- `"and they answer me in French even though I speak German wtf xD"`
- Explanation: Shows frustration with support handling.

great_paimon
- Idea: Gives detailed warnings about distributor policies, royalties, and legal risk.
- Stance: critical/cautious.
- Attitude: informative, cautionary.
- Evidence:
- `"TuneCore and CD Baby are known to reject"`
- Explanation: Warns the community about distributors hostile to AI music.
- `"People learn the hard way about TuneCore rejecting AI music"`
- Explanation: Reinforces the recurring problem.
- `"If you are knowingly violating copyright (or defamination, etc.), be prepared for any potential consequence"`
- Explanation: Explicitly frames this as legal risk.

.derbaum.
- Idea: Repeatedly reinforces that uploaded material must be the user's own and warns that the user bears the risk.
- Stance: critical/cautious.
- Attitude: strict, admonishing.
- Evidence:
- `"because sunos TOS simply rule out everything we dont own."`
- Explanation: Explicitly states the governing rule.
- `"if you input a sample or text in suno that isnt yours you break the tos."`
- Explanation: Clear statement of violation.
- `"if you get in trouble your account gets canceled."`
- Explanation: States consequence.
- `"copyright stuff is always pretty expensive..."`
- Explanation: Warns about legal exposure.

hookjflywheel
- Idea: Minimizes the problem by comparing copyrighted material use to common online covers and arguing it’s not monetized.
- Stance: supportive/defensive of the questioned practice.
- Attitude: confrontational, dismissive.
- Evidence:
- `"There are millions of people that do covers. It's not monitized and it falls under fair use."`
- Explanation: Defends the conduct by invoking broader internet norms.
- `"Who the is releasing and monitizing covers here?"`
- Explanation: Pushes back against warnings with a rhetorical challenge.

viperstrikersf5
- Idea: Pushes back on rule enforcement by claiming others, even moderators, use copyrighted material too.
- Stance: defensive/supportive of relaxed enforcement.
- Attitude: confrontational.
- Evidence:
- `"Yes 3daizy is a mod she used a disney song as audio reference"`
- Explanation: Attempts to point to inconsistent enforcement.
- `"All over suno"`
- Explanation: Suggests widespread violation as defense.

Suno Team Response

furrybeans
- States that using unofficial APIs or automation to access Suno violates the Terms of Service and may trigger account action.
- Reiterates that uploaded/used material rules matter and that the platform does not use user material to learn.
- Evidence:
- `"If you are using an API to access the Suno website, you are breaking the Terms of Service and action may be taken against your account."`
- Explanation: Clear enforcement position on unauthorized automation.
- `"it can only not be set public in Suno"`
- Explanation: Clarifies a restriction related to uploaded voice material.
- `"it doesn't use user material to learn from."`
- Explanation: Directly addresses concern about uploaded content being used as training data.

Additional Evidence (Optional)

`"you can use that as a prompt"`
Explanation: Shows a user casually treating potentially copyrighted campaign/story material as acceptable input, reinforcing how often this issue comes up.

Topic: Song Theft, Impersonation, and Ownership Protection

Description

A second major area of tension is theft and impersonation after songs are generated and published. Users discuss songs being stolen, falsely distributed, or uploaded by others claiming ownership. This is ethically and legally charged because the conflict is not over style or quality, but over ownership and fraud-like behavior around publication and monetization.

The discussion evolves from a single complaint about stolen work into broader discussion of distributors, YouTube handling, and how to protect work before thieves exploit it. Users recommend distributors and Content ID-like services specifically to guard against theft. The tone is more aggrieved and urgent than in the broader copyright discussion.

Timeline

- **2024-06-15 05:11:11 - 05:22:30**
- **2024-06-15 10:26:13 - 10:35:22**
- **2024-06-15 17:49:32 - 17:50:18**

The topic begins with a user reporting direct theft, then expands into discussion of how to protect tracks by distributing them first or using services like Distrolock / Content ID. Later comments show theft protection becoming part of users' publishing strategy.

Key Participants

american_pride
- Idea: Reports direct theft of two songs and describes trying to recover them through YouTube/distributors.
- Stance: critical.
- Attitude: angry, distressed.
- Evidence:
- `"I have been able to reclaim my first song, but I think the thief is going to win on the second"`
- Explanation: Establishes active ownership dispute.
- `"crafty fuck uploaded it to a distributor passing it as his own work"`
- Explanation: Describes the alleged theft mechanism.
- `"lesson learned, it's a sucky one but a lesson learned all the same"`
- Explanation: Shows the discussion moved toward defensive strategy.

shiroken
- Idea: Helps investigate and escalate against the alleged thief.
- Stance: critical.
- Attitude: practical, aggressive.
- Evidence:
- `"I found his distributor via his twitter, im sure all his songs are stolen"`
- Explanation: Claims broader misconduct and intensifies the case.
- `"They will yank everything."`
- Explanation: Expresses confidence in enforcement remedy.

sushileafbeats
- Idea: Recommends fingerprinting/content ID style protection and uploading through distributors to defend against theft.
- Stance: critical of theft, supportive of preventative protection.
- Attitude: practical, advisory.
- Evidence:
- `"there is also the free service from Distrokid called Distrolock"`

- Explanation: Suggests a concrete anti-theft measure.
- `"I recommend getting with a distributor that can offer YouTube Content ID for your songs."`
- Explanation: Reframes the issue from reaction to prevention.

iicaptain73
- Idea: Publishes tracks partly to protect them from “music thieves.”
- Stance: critical.
- Attitude: pragmatic, wary.
- Evidence:
- `"I really just wanted to try and protect my song that was up the top of trending before the music thieves take their shot at it."`
- Explanation: Shows fear of theft shaping publishing decisions.

Suno Team Response

No response from Suno team in the logs

Additional Evidence (Optional)

`"As long as you distribute it first / You’ll always win"` — **odd101**
Explanation: Shows a user belief that early distribution can help establish priority or protection, fitting the ownership-protection theme.

Topic: Distributors Rejecting AI Music / Transparency of AI Policies

Description

There is recurring friction around external music distributors rejecting AI-generated music or failing to clearly disclose those policies. Users specifically complain that distributors accepted earlier releases, then later rejected new ones, or rejected them through vague infringement-style emails rather than clear AI-policy language.

The conflict is ethical/legal because users argue about transparency, fairness, and whether AI-assisted works should qualify. Over time, the discussion shifts from individual confusion to collective recommendation-sharing about which distributors to avoid and which may be safer.

Timeline

- **2024-06-15 07:01:57 - 07:02:26**
- **2024-06-15 10:00:20 - 10:39:37**
- **2024-06-15 10:44:16 - 10:46:52**
- **2024-06-18 16:16:38 - 16:24:24**

Discussion begins with one warning about TuneCore not supporting “100% Generative AI.” It then broadens as multiple users compare experiences, criticize vague policies, and suggest alternatives like Distrokid, LANDR, or Ditto.

Key Participants

iicaptain73
- Idea: Warns to avoid TuneCore and criticizes unclear rejection notices.
- Stance: critical.
- Attitude: frustrated, detailed.
- Evidence:
- `"I recommended avoiding TuneCore."`
- Explanation: Direct recommendation based on bad experience.
- `"they have apparently decided they do not support generative AI music"`
- Explanation: States the distributor’s position as experienced by the user.
- `"the automated email was insulting and wrong to imply that i have copied someone else's work"`
- Explanation: Criticizes how the rejection was communicated.

realsemper
- Idea: Wants a new publisher and challenges TuneCore’s lack of transparency.
- Stance: critical.
- Attitude: formal, annoyed.
- Evidence:
- `"my publisher does not accept AI music so I am looking for a new one"`
- Explanation: States the problem directly.
- `"I kindly request you to update the Terms of Service accordingly or cease the rejection of this content"`
- Explanation: Pushes back formally on the distributor.

dfynt1
- Idea: Strongly criticizes TuneCore and recommends leaving distributors that reject AI work.
- Stance: critical.
- Attitude: confrontational.
- Evidence:
- `"Boo ■ to tune core. You don't want our business then u know where you can go"`
- Explanation: Clear hostile reaction toward the distributor.
- `"If they don't want your business take it elsewhere"`
- Explanation: Advocates switching.

alikan
- Idea: Shares practical comparison of distributors and fees.
- Stance: neutral to critical.
- Attitude: pragmatic.
- Evidence:
- `"Distrokid has a lot of 2ndry fees"`
- Explanation: Critiques hidden/add-on costs.
- `"I have been advised Landr maybe better."`
- Explanation: Offers alternative based on community experience.

great_paimon
- Idea: Provides structured guidance on distributors, terms, and legal/royalty clauses.
- Stance: critical/cautious.
- Attitude: analytical, advisory.
- Evidence:
- `"You especially want to find out how they distribute royalty and for any clauses that will make them retain it instead of giving it to you"`
- Explanation: Broadens the debate from acceptance alone to financial risk.

Suno Team Response

No response from Suno team in the logs

Additional Evidence (Optional)

`"Landr doesnt remove your Songs if you cancel your sub"` — **drakolyr**
Explanation: Highlights why users compare distributors: policy differences have direct consequences for AI musicians.

Topic: Upload Feature Restrictions and False Voice Detection

Description

Users repeatedly express tension over the upload audio feature, especially when it blocks publication because it believes an uploaded sound contains vocals. The ethical/legal angle is that the restriction exists to prevent unauthorized voice cloning or publication of uploaded voice-derived songs, but users are frustrated when non-vocal sounds such as riffs, ambient clips, or even dinosaur/wolf sounds are flagged.

The discussion evolves from confusion about how uploads work to a sharper complaint that the moderation/filtering is overbroad or inconsistent. Users contrast what is allowed privately versus what can be made public, and some describe false positives as limiting legitimate creative use.

Timeline

- 2024-06-15 02:40:49 - 02:45:06
- 2024-06-15 05:02:28 - 05:02:41
- 2024-06-15 06:33:51 - 06:37:10
- 2024-06-15 17:51:50 - 17:55:28
- 2024-06-15 17:56:08 - 18:03:33
- 2024-06-17 17:51:50 - 17:55:28
- 2024-06-18 00:58:51 - 01:00:02

Key Participants

quantumfortune
- Idea: Frustrated that original uploaded guitar riffs are blocked from public release.
- Stance: critical.
- Attitude: confused, frustrated.
- Evidence:
- `"I am seeing some of my songs not allowed to be made public on Suno because of content restriction. I don't have any swearing or anything explicit."`
- Explanation: Shows confusion that restrictions are triggered despite non-explicit content.
- `"It only has guitar riffs I made up"`

- Explanation: Claims the flagged source is original and non-vocal.
- `"It's a false flag"`
- Explanation: Explicitly labels the detection erroneous.

sushileafbeats
- Idea: Explains that the restriction is voice-detection based, but notes false positives.
- Stance: neutral to critical.
- Attitude: explanatory.
- Evidence:
- `"this is if Suno detects vocals in the sample. so you can't publicly replicate someone elses voice"`
- Explanation: Clarifies the rule rationale.
- `"it false flags sometimes"`
- Explanation: Acknowledges implementation problems.
- `"No voices. Can't make it or it's extend's public."`
- Explanation: Gives a direct example of false flagging.

drakolyr
- Idea: Notices the filter seems stricter lately and finds some blocks inconsistent.
- Stance: critical.
- Attitude: frustrated, puzzled.
- Evidence:
- `"I feel the Filter in the last Days is either going more strickt"`
- Explanation: Suggests a worsening trend.
- `"my Song about Alcohol is on the Front Page, while a Song about AI and a funny Song about Money Problems are blocked"`
- Explanation: Points to perceived inconsistency.

steicamel
- Idea: Complains that even dinosaur sounds are treated as voice content.
- Stance: critical.
- Attitude: sarcastic, annoyed.
- Evidence:
- `"Dinosaur roars count as voice and can't be public'd"`
- Explanation: Concrete example of an overbroad filter.
- `"That dinosaur might hear its voice and sue"`
- Explanation: Sarcastic criticism of the detection system.

Suno Team Response

furrybeans
- Explains that voice uploads are intentionally prevented from being made public, and suggests there are technical/quality reasons some behavior exists.
- Evidence:
- `"It will basically give you a close approximation of your voice."`
- Explanation: Confirms the feature can emulate a user’s voice, which explains why publication controls exist.
- `"it can only not be set public in Suno"`
- Explanation: Clarifies that the restriction is platform-level publication, not total use prohibition.

Additional Evidence (Optional)

`"We all really want folders ■"` — **alikan**

Explanation: While not directly legal, it shows that workflow frustrations are piling onto moderation frustrations around uploads.

Chunk 6: 2024-06-18 to 2024-06-22

Topic: Copyright, Terms of Service, and Uploading Third-Party Audio

Description

A repeated source of tension is whether users can upload or reuse copyrighted or otherwise licensed material in Suno, especially through the audio upload feature. The conflict appears in several forms: users asking if they can upload songs they already released, asking about “non-copyright” or Creative Commons music, discussing covers/remixes, and a prolonged argument over whether parody/fair use overrides Suno’s own rules. The core tension is between users trying to stretch or work around upload possibilities and others insisting Suno’s rules prohibit using audio one does not own.

The discussion evolved from practical questions into clearer community enforcement. Early on, users explained the rule in broad terms, e.g. “as long as you own the copyrights its fine.” Later, more explicit friction appears when a user says they uploaded their own Spotify-released song but it was blocked, and others explain fingerprinting/copyright-detection issues. Later still, there is direct dispute over whether parody/fair use justifies uploading copyrighted source material; multiple users and mods/guide-level participants push back, stressing that Suno’s TOS is separate from whatever a user thinks broader copyright law may allow.

A closely related subtopic is whether “non-copyright” or Creative Commons music is allowed. The answer given in the logs is effectively no, unless the uploader owns all rights. This becomes contentious because some users try to treat “CC,” public domain, or parody as safe categories, while others repeatedly emphasize that Suno’s upload rule is stricter.

Timeline

- 2024-06-18 18:58:48 - 19:01:27
- 2024-06-18 19:07:55 - 19:12:04
- 2024-06-18 20:22:41 - 20:34:00
- 2024-06-18 22:00:48 - 22:02:52
- 2024-06-21 10:58:59 - 11:01:03
- 2024-06-21 21:46:17 - 21:57:13
- 2024-06-22 10:39:39 - 10:41:29
- 2024-06-22 13:10:58 - 13:16:24

How the discussion evolved
- It begins with practical rule clarification around covers and distribution: “Be careful about covering music” and “He asked me.”
- It then broadens into upload/remix questions, where users note uploads must be rights-owned.
- A more emotionally charged phase occurs when a paid user cannot upload their own Spotify-distributed track; others explain why detection still blocks it.

- Later, users ask about NCS/Creative Commons/public domain audio, and the answer given becomes stricter: even licensed or public domain material may still violate Suno's upload rules if the uploader does not own all rights.
- The most contentious phase is a long dispute over whether parody/fair use makes an upload acceptable. Other users repeatedly reject that argument, emphasizing Suno's TOS over personal legal interpretations.
- By the end, moderators/guides explicitly warn that continuing to discuss breaking the TOS can lead to action.

Key Participants

build.a.better.world
- Idea: Warns against using non-owned lyrics/audio and frames this as a TOS issue that could become problematic.
- Stance: critical
- Attitude: cautionary, calm
- Evidence:
- "Be careful about covering music :doublethumbs: As explained in the TOS, it's encouraged to not use Suno to create using lyrics/audio that aren't yours. Could become problematic"
- Explanation: This directly states a restrictive interpretation tied to Suno's TOS and warns of consequences.

klarp
- Idea: Says paid users can upload to Spotify, but only if they are paid; also tells people not to post songs in general.
- Stance: neutral
- Attitude: matter-of-fact, slightly blunt
- Evidence:
- "You'd need a paid plan to use it for Spotify"
- Explanation: This gives a straightforward rules-based answer about commercial use.
- "Don't post your songs here :Clueless:"
- Explanation: Shows a blunt tone while redirecting behavior.

sushileafbeats
- Idea: Repeatedly explains that uploaded music on public platforms may be fingerprinted and blocked, even if it is the uploader's own work; also strongly insists people should not use material they do not own.
- Stance: critical
- Attitude: firm, admonishing, sometimes sarcastic
- Evidence:
- "Suno doesnt know YOU are that artist. its working as intended."
- Explanation: Explains why an artist's own distributed music may still be blocked.
- "when you distribute music to streaming services, you are fingerprinted and thus flagged in these cases."
- Explanation: Directly explains the detection issue as described in the chat.
- "you can't copy other songs tho"
- Explanation: A direct prohibition stance.
- "if i go rob a store, but no one called it in, have i broken a law?"
- Explanation: Uses analogy to reject the argument that unpunished copying is acceptable.
- "the original owner of the original work has legal right to go after those people."
- Explanation: Reinforces legal risk even outside Suno's enforcement.

encino.man
- Idea: Sympathizes with users blocked from using their own music and suggests that a future ownership-verification feature would help.
- Stance: critical
- Attitude: sympathetic, constructive
- Evidence:
- "would be nice to prove ownership somehow"
- Explanation: Suggests a feature gap rather than disputing the rule itself.
- "nah I agree that is a headache"
- Explanation: Shows sympathy for a user blocked from uploading their own track.
- "just someway to prove you own the track, but that feature does not exist"
- Explanation: Explicitly identifies the missing capability.

frowns_78143
- Idea: Explains that distributed works trigger third-party systems and that Suno lacks a way to mark them as allowed; later rejects the idea that copying/reuse concerns are harmless.
- Stance: critical
- Attitude: explanatory, later dismissive toward weak justifications
- Evidence:
- "if you are using a 3rd party distributor, this is just what happens. it would trigger google's content id as well"
- Explanation: Frames the issue as standard rights-detection behavior.
- "you'll need to manually 'allow' your own work to be used in each case, and i don't think suno has that option yet"
- Explanation: Identifies a system limitation.
- "copyright infringement is definitely a no go"
- Explanation: Makes his position explicit.

sirbitesalot
- Idea: Argues that the upload rule is stricter than many assume, possibly even excluding public domain audio if the uploader does not own all rights.
- Stance: critical
- Attitude: analytical, skeptical
- Evidence:
- "strictly speaking you are not even allowed to use public domain audio. The first pop up restricts you to audio you own all the rights to.."
- Explanation: This is one of the strongest statements of a restrictive reading of the upload rule.
- "The TOS requires you to own rights to everything you upload."
- Explanation: Reinforces the ownership requirement in a later argument.

furrybeans [Suno Team]
- Idea: States that uploaded audio with copyright or license attached is blocked, and warns against copyrighted uploads.
- Stance: critical
- Attitude: direct, explanatory
- Evidence:
- "Just don't upload anything with copyrighted material"
- Explanation: Clear rule statement from Suno team.
- "It blocks audio that has some kind of copyright or licence attached to it. Including creative commons stuff."
- Explanation: Explicitly answers the “NCS/creative commons” question with a restrictive position.

Suno Team Response

furrybeans [Suno Team]
- Suno team explicitly warns not to upload copyrighted material and says the system blocks audio with copyright or license attached, including Creative Commons material.
- Evidence:
- "Just don't upload anything with copyrighted material"
- "It blocks audio that has some kind of copyright or licence attached to it. Including creative commons stuff."

Additional Evidence (Optional)

"Even I can't use my own music I've distributed, been producing beats for almost 10 years. just how she goes though if they are in the public databases..."
Explanation:
This supports the claim that even self-owned released music may be blocked once it is in public fingerprinting databases.

Topic: Voice Imitation, Celebrity Attribution, and False Association

Description

Another clear ethical contention concerns AI-generated songs that imitate or appear to be performed by celebrities. The tension becomes explicit when a user posts songs that others say sound like Johnny Cash/Robert Plant and are labeled in a way that suggests celebrity performance. Community members object on both rule-based and ethical grounds, saying it is “not cool to put words in someone elses mouth,” while moderation removes the content for false attribution and rule violations.

This topic evolves from curiosity about reproducing a voice to direct moderation. First, a user boasts: “So I've figured out how to force Suno into singing with exactly the voice I want.” The discussion then shifts to examples sounding like known singers. Other users question whether this was done via AI voice cover or by accident, and debate whether Suno’s voice library can accidentally generate similar-sounding results. Finally, a moderator explicitly intervenes, stating such songs are not allowed if they are falsely attributed to celebrities.

Timeline

- **2024-06-18 19:26:41 - 19:30:13**
- **2024-06-18 19:35:35 - 19:42:16**
- **2024-06-18 19:43:42 - 20:00:03**

How the discussion evolved
- It starts with a user claiming they can force very specific voices.
- Others respond with curiosity and skepticism, asking how the effect was achieved.
- Community concern builds as users mention celebrity names and server PG-13 / attribution rules.
- A moderator then clearly states the rule and removes the content.
- After moderation, the original poster acknowledges the issue and says some similarities happen “by accident.”

Key Participants

wolfemacleod
- Idea: Claims to have figured out how to force Suno into very specific voices and shares examples resembling famous singers; later argues some existing-like voices occur “by accident.”
- Stance: supportive
- Attitude: boastful, then apologetic/defensive
- Evidence:
- "So I've figured out how to force Suno into singing with exactly the voice I want."
- Explanation: Explicit claim of controllable voice imitation.
- "Take a listen and tell me that ain't Cash's voice."
- Explanation: Directly references celebrity similarity.
- "That is totally understood, but it also happens by accident as well."
- Explanation: Tries to soften or reframe the issue after moderation.

sushileafbeats
- Idea: Strongly objects to emulating real voices without permission and says Suno does not want to be associated with that.
- Stance: critical
- Attitude: firm, admonishing
- Evidence:
- "it's not cool to put words in someone elses mouth"
- Explanation: Explicit ethical objection.
- "it's clear Suno doesn't want to be attributed to such projects."
- Explanation: Connects the objection to platform positioning.
- "common sense seems so rare these days"
- Explanation: Shows frustration and disapproval.

3daizy
- Idea: States the server does not allow non-PG-13 songs or false celebrity attribution and removes the songs.
- Stance: critical
- Attitude: authoritative, corrective
- Evidence:
- "we do not allow songs that are not PG-13 or falsely attributed to a celebrity who did not perform them."
- Explanation: This is the clearest moderation statement on the issue.

ibrvndy
- Idea: Questions how the result was achieved, suggesting AI voice cover upload as one possible route.
- Stance: neutral
- Attitude: curious
- Evidence:
- "did you use an ai voice cover then upload an audio or how did you get that outcome lol."
- Explanation: Shows the issue changed the direction of discussion by prompting method questions.

Suno Team Response

No response from Suno team in the logs

Additional Evidence (Optional)

"Please note that we do not allow songs that are not PG-13 or falsely attributed to a celebrity who did not perform them."
Explanation:
This moderator quote is the central evidence that false celebrity attribution is treated as a rule violation in the server.

Topic: Transparency and Fairness of Trending/Front-Page Filtering

Description

A persistent contentious topic is whether Suno's front-page/trending system is fair, transparent, or functioning properly. Users repeatedly complain that songs with good ratios, many plays, or apparent popularity do not trend, while other songs do. The issue is framed partly as moderation/filtering and partly as unexplained algorithmic behavior. The ethical angle is weaker here than other topics, but it is clearly tied to platform governance and visibility decisions.

The conflict develops in several stages. First, users complain that songs with good likes/views are excluded and speculate about specific words causing filtering. Then users explicitly call the filter "frustrating," especially when they write their own lyrics. They ask for transparency, e.g. a tag showing a song is blocked. Later, there is friction around apparent manipulation of trending through copied songs and bots. Multiple users discuss copied songs, odd play counts, "trending destroyer," and view/like anomalies. This broadens the issue from censorship/filter opacity to enforcement and anti-abuse concerns.

Timeline

- **2024-06-18 17:56:46 - 18:18:02**
- **2024-06-18 19:14:07 - 19:19:44**
- **2024-06-18 20:07:17 - 20:10:14**
- **2024-06-19 06:21:20 - 06:59:05**
- **2024-06-20 10:28:19 - 10:41:23**

How the discussion evolved
- Starts with users wondering why songs with strong view/like ratios do not trend.
- Moves into specific speculation about words like "Like that! Yeah!", "Boom!", "cheats," and "ghost moans."
- Users increasingly frame the issue as a transparency problem, not just a filtering problem.
- Later, users discuss possible artificial view spikes and songs appearing on trending suspiciously fast.
- The issue culminates in discussion of copied songs and possible botting on trending, which turns frustration with the filter into frustration with both abuse and moderation opacity.

Key Participants

.derbaum.
- Idea: Repeatedly questions why songs do not trend and speculates about harmless words triggering filters.

- Stance: critical
- Attitude: frustrated, puzzled
- Evidence:
- "i am not sure why it cant trend... no bad words, good quality, highly complex, proper ending"
- Explanation: Explicit complaint that a seemingly safe song is excluded.
- "maybe because i said 'Boom!' who knows"
- Explanation: Shows confusion and speculation about trigger words.

drakolyr
- Idea: Says the front-page filter has gotten worse, is frustrating, and is especially painful for people who write their own lyrics.
- Stance: critical
- Attitude: frustrated, sarcastic
- Evidence:
- "The Filter works great :kappa:"
- Explanation: Sarcastic complaint.
- "Its just frustrating, especially if you write your own Song Lyrics"
- Explanation: Ties filter frustration to creative effort.
- "Songs who didnt got blocked before, are now blocked?"
- Explanation: Indicates perceived worsening over time.

sirbitesalot
- Idea: Wants transparency about whether songs are blocked or simply unlucky; gives examples of huge credit costs from trying to work around filtered words.
- Stance: critical
- Attitude: analytical, frustrated
- Evidence:
- "Filter really needs to improve and we should see if it's blocked or just bad luck"
- Explanation: Explicit fairness/transparency complaint.
- "a simple tag would at least be more transparent"
- Explanation: Direct request for better visibility into moderation.
- "that cost me 1500 credits to redo with wail instead of moan"
- Explanation: Shows practical cost of opaque filtering.

dazorn
- Idea: Questions suspicious view spikes and why songs are not trending despite large numbers.
- Stance: critical
- Attitude: confused, suspicious
- Evidence:
- "My song increased times listened from 26 to 1k in less than 2 minutes, but still not in trending... is this a bug?"
- Explanation: Directly challenges the fairness or correctness of the system.
- "Maybe a bot"
- Explanation: Shows suspicion of manipulation.

around_once
- Idea: Complains that a copied version of their song is appearing on trending and being boosted suspiciously fast.
- Stance: critical
- Attitude: alarmed, frustrated
- Evidence:
- "It's my song he stole"
- Explanation: Frames the trending issue as abuse.

- "They got to have some kind of bot or something going"
- Explanation: Explicit botting suspicion.
- "Trending destroyer is a pretty deliberate name"
- Explanation: Sees the act as intentional sabotage.

steicamel
- Idea: Points out suspicious copies and suggests trending behavior is abnormal.
- Stance: critical
- Attitude: suspicious, dryly amused
- Evidence:
- "You see the person trying to scam contest slowly"
- Explanation: Describes perceived abuse/manipulation.
- "They just took the lyrics and made another version"
- Explanation: Frames copying as part of the trending issue.

Suno Team Response

furrybeans [Suno Team]
- Suno team explains some feed/trending behavior and acknowledges uncertainty around exact causes, but does not provide a full transparency answer in these logs.
- Evidence:
- "It's probably just going to be a list of songs recently released by people you follow."
- Explanation: Explains the new feed page, not trending itself, but shows limited team commentary on discovery/distribution systems.

Additional Evidence (Optional)

"The Trending Page is *very* discerning about what makes it on there ■"
Explanation:
This user summary reflects the broader tone of confusion and resignation around trending behavior.

Topic: Harassment/Defamation Song Naming a Minor

Description

A more concrete ethical issue appears when a user reports a song allegedly created to target their underage son by name and mock him. This is one of the clearest harassment concerns in the logs: the parent says the song includes the child’s full name and a mocking nickname used by schoolchildren, and asks for help deleting it. The discussion does not develop into a debate; instead it is treated as a serious abuse report.

Timeline

- **2024-06-20 10:25:42 - 10:28:12**
- **2024-06-21 09:38:47 - 09:49:09**

How the discussion evolved

- The user first posts the complaint, describing the son as “underage” and “sensitive,” and says classmates used the song to mock him.
- Another user asks clarifying questions and says it likely violates TOS.
- The parent later reposts asking people to report the song because support has not yet answered.
- A Suno team member later says they looked into it and that it appears to be a judgment-call case because the named person has a public footprint.

Key Participants

bourrgeoiss
- Idea: Says a song is being used to mock their 14-year-old son by full name, contributing to school harassment, and asks for deletion/reporting.
- Stance: critical
- Attitude: distressed, pleading
- Evidence:
- "One song is made to provocate my underage son he is just 14years old and so sensitive"
- Explanation: Explicitly frames the issue as targeted harassment of a minor.
- "Schools kids make it and put his name and surname ... everyone in school laughed at him"
- Explanation: Directly describes harm caused.
- "Please report song for inappropriate, they use name and surname and make defamation"
- Explanation: Clear request for action.

degenlawyeroliver
- Idea: Suggests it likely violates the TOS and points the user toward moderation.
- Stance: critical
- Attitude: calm, procedural
- Evidence:
- "I believe that this violates the Terms of Service"
- Explanation: Connects the complaint to platform rules.
- "Maybe you can get a mod to help take it further."
- Explanation: Encourages escalation through proper channels.

Suno Team Response

furrybeans [Suno Team]
- Says the case was reviewed and describes it as potentially a judgment call because the named individual appears publicly in search results.
- Evidence:
- "I looked at this yesterday and have asked for other mods to also take a look."
- Explanation: Confirms escalation/review.
- "Whether it's allowed or not to make a song about a specific person wanting to eat a salamander is likely a judgment call"
- Explanation: Shows the team had not resolved it definitively in the logs.

Additional Evidence (Optional)

"One song is made to provocate my underage son"
Explanation:
This is the clearest direct statement of harm involving a minor.

Topic: Commercial Rights, Ownership, and Distribution Rights for Paid vs Free Users

Description

There is repeated tension around what rights users have over music they generate, especially whether they can upload to Spotify/YouTube and whether rights persist after subscription cancellation. This is less adversarial than the other topics, but it is still contentious because users are uncertain, ask repeatedly, and sometimes react strongly when answers imply they cannot use tracks commercially.

The discussion evolves from simple Q&A ("Can I upload to Spotify?") into edge cases: whether rights apply retroactively after upgrading, whether rights continue after the subscription ends, and whether generated songs can be reused in commercial contexts if made while free. There is no direct argument in most of these messages, but there is visible friction when users realize limitations, e.g. "That's scummy asf" when credits disappear after cancellation.

Timeline

- 2024-06-18 18:28:20 - 18:29:14
- 2024-06-18 19:48:26 - 19:49:39
- 2024-06-18 20:46:05 - 20:47:23
- 2024-06-18 20:58:58 - 21:00:18
- 2024-06-19 02:09:39 - 02:15:19
- 2024-06-19 04:52:42 - 04:53:45
- 2024-06-20 03:29:32 - 03:30:37
- 2024-06-21 23:31:20 - 23:31:57

How the discussion evolved
- Starts with straightforward answers: paid users can upload to Spotify.
- Expands into whether users need to disclose Suno use and whether artwork belongs to them.
- Later, users complain about lost credits after subscription changes or ask if old free songs gain rights after upgrading.
- Across messages, the consistent distinction is: paid-generated songs can be commercially used; free-generated songs cannot.

Key Participants

klarp
- Idea: States paid plan is required for Spotify use.
- Stance: neutral
- Attitude: direct
- Evidence:
- "You'd need a paid plan to use it for Spotify"
- Explanation: Straight rights clarification.

drakolyr
- Idea: Repeatedly tells users paid account means they can upload/distribute.
- Stance: neutral

- Attitude: matter-of-fact
- Evidence:
- "Yes you can, as a paid user."
- Explanation: Clear answer about commercial rights.

sushileafbeats
- Idea: Clarifies that songs made during a paid subscription have commercial rights and remain usable after the subscription ends.
- Stance: neutral
- Attitude: helpful
- Evidence:
- "can do whatever you want with them, just can't earn money unless you made the songs during a PAID subscription to suno."
- Explanation: Direct statement of the paid/free distinction.

z_doctor
- Idea: Says rights do not apply retroactively if the song was made before subscribing.
- Stance: neutral
- Attitude: explanatory
- Evidence:
- "if you generate a song then get the subscription then it doesn't apply retroactively"
- Explanation: Clarifies a key edge case.

Suno Team Response

No response from Suno team in the logs

Additional Evidence (Optional)

"Will my right to song will remain even my subscription plan ends"
Explanation:
This repeated kind of question shows ongoing uncertainty and tension over ownership rules.

Chunk 7: 2024-06-22 to 2024-06-26

Topic: Copyright / Training Data Lawsuit Against Suno and Udio

Description

The logs contain a clear ethical/legal contention about whether AI music generation is built on copyrighted material and whether lawsuits against Suno are justified. The tension begins with direct concern over whether Suno “train[s] on illegal data” and later expands into extended disagreement over the lawsuit, copyright, ownership, and fairness to artists.

The discussion has several conflicting positions:
- Some users express concern that Suno may be using copyrighted or “illegal” training data.
- Some users dismiss or challenge those concerns, arguing that training on existing music is analogous to human inspiration.
- Others argue that the lawsuit is expected and serious, emphasizing that the labels are alleging unauthorized training on copyrighted works.
- There is also visible hostility toward record labels, with users framing the lawsuit as anti-innovation or hypocritical.

This is a topic of contention because it includes direct criticism, disagreement over legality and ethics, and multiple users pushing opposing interpretations of the same event.

Timeline

- 2024-06-22 10:39:20 - 2024-06-22 10:50:50
- 2024-06-24 15:22:14 - 2024-06-24 15:24:08
- 2024-06-25 05:26:25 - 2024-06-25 06:01:56
- 2024-06-25 09:03:35 - 2024-06-25 09:10:00
- 2024-06-25 11:32:31 - 2024-06-25 11:43:09
- 2024-06-25 15:22:14 - 2024-06-25 15:25:24
- 2024-06-25 17:55:40 - 2024-06-25 18:05:37
- 2024-06-25 18:46:48 - 2024-06-25 19:29:59
- 2024-06-26 00:47:00 - 2024-06-26 01:00:01
- 2024-06-26 11:38:54 - 2024-06-26 11:45:48

How the discussion evolved over time:

- It starts as a direct question about whether Suno trains on “illegal” or copyrighted data.
- A Suno team member responds cautiously, questioning what would legally count as “illegal” and noting that the team/investors would have considered it.
- After news of the lawsuit appears in the logs, the discussion becomes much broader and more heated, moving from speculation about training data to arguments about record labels, fair use, AI training, evidence, and whether Suno users should worry.
- Later messages show users citing articles and complaint documents, while others dismiss the suit as weak, hypocritical, or anti-innovation.
- By the end of the chunk, the topic is recurring rather than resolved: users continue alternating between legal concern, anti-label sentiment, and “wait and see” reactions.

Key Participants

gay.exe
- Idea: Raises the initial concern that Suno may train on “illegal” or copyrighted art/music and asks for confirmation.
- Stance: critical
- Attitude: concerned, questioning
- Evidence:
- "does Suno like train on illegal data Or something or copyrighted data!!"
- Explanation: This directly introduces the ethical/legal concern about training data.
- "I see ppl saying AI trains illegally on art/music and stuff"
- Explanation: Shows the concern is specifically framed as illegal training on copyrighted works.

drakolyr
- Idea: Responds skeptically that outsiders cannot know for sure and implies the team would not disclose details.
- Stance: neutral
- Attitude: casual, skeptical
- Evidence:
- "Well we cant know? ■"
- Explanation: This explicitly rejects certainty about the training-data allegation.
- "Yes, but they wont tell"
- Explanation: Suggests limits to transparency without claiming any legal conclusion.

joshuasodil
- Idea: Offers an unsupported explanation that audio upload exists to protect Suno from copyright lawsuits, then later participates in broader discussion around the lawsuit.
- Stance: neutral
- Attitude: confident, speculative
- Evidence:
- "The reason Suno has the upload audio option now is specifically so they protect their ahhhh, from getting sued for copyrighted stuff."
- Explanation: This is a direct claim connecting product design to copyright-risk mitigation.
- "They want people to upload original audios to train off of."
- Explanation: Adds a second explanatory claim about intended lawful use of original user uploads.

furrybeans [Suno Team]
- Idea: Pushes back on the framing of “illegal” training, asks what part of copyright law would prohibit training, and later clarifies that all public knowledge is what is already in press coverage.
- Stance: neutral
- Attitude: measured, slightly sarcastic/pedantic

- Evidence:
- "I'm sure they train on something. Otherwise there would be nothing."
- Explanation: Confirms only the obvious fact that some training data exists.
- "What data would be 'illegal'?"
- Explanation: Challenges the user’s framing of the issue.
- "What part of copyright law would prevent copyrighted content from being trained on?"
- Explanation: Explicitly questions the legal assumption behind the complaint.
- "I don't know the details or how copyright comes into play with regard to training an AI"
- Explanation: The team member does not claim internal legal knowledge here.
- "All of the information available is in whichever articles have been written on the subject."
- Explanation: Later indicates no extra public clarification beyond media/legal documents.

draconiator
- Idea: Brings in outside reporting that record labels are suing Suno/Udio and criticizes the labels.
- Stance: critical of the lawsuit / supportive of Suno
- Attitude: hostile toward labels
- Evidence:
- "record labels sue AI firms Suno and Udio"
- Explanation: Introduces the lawsuit into chat with a news link.
- "Now the RIAA proves that they're just as corrupt as PETA."
- Explanation: Strongly critical framing of the plaintiffs.

degenlawyeroliver
- Idea: Argues the lawsuit should not be brushed off lightly and says, based on long copyright-law experience, that it is a real concern.
- Stance: critical / concerned
- Attitude: serious, professional
- Evidence:
- "I would not brush it off easily, tbh. It is a major concern."
- Explanation: Explicitly states the issue is serious.
- "I have been a copyright lawyer (in Europe) for almost 20 years and I see it as a concern."
- Explanation: States relevant experience and uses it to support his concern.
- "It will be very long (if at all) that this has any effect on the USERs."
- Explanation: Narrows the concern to legal seriousness while also calming immediate user fears.

alikan
- Idea: Strongly disputes the strength of the complaint, especially its assumptions about illegal training data, and portrays the labels’ complaint as weak and strategic.
- Stance: critical of the lawsuit / supportive of Suno
- Attitude: dismissive, argumentative
- Evidence:
- "the alledged complain is to do with training data"
- Explanation: Summarizes the core legal issue as he sees it.
- "ITS OBVIOUS is the worst attack I ever read"
- Explanation: Mocks the complaint’s reasoning.
- "the complant is lawyer talk with zero evidence"
- Explanation: Explicitly dismisses the case as unsupported.
- "if the record industry is going to pretend to not bein using AI themselves"
- Explanation: Adds a hypocrisy argument against the plaintiffs.

encapsulation
- Idea: Argues that AI training is not theft or infringement because it is like human artistic inspiration.
- Stance: supportive of AI training / dismissive of lawsuit logic

- Attitude: assertive
- Evidence:
- "AI training isnt theft or infringement."
- Explanation: This is a direct normative/legal claim.
- "This is because it's no different than growing up listening to your favorite artists and taking inspiration in your own music."
- Explanation: Gives the human-inspiration analogy as justification.

pettyfox
- Idea: Argues it is obvious copyrighted songs were used in training and that record labels are right to sue over copyright infringement.
- Stance: critical of Suno / supportive of lawsuit
- Attitude: blunt, disapproving
- Evidence:
- "I mean it's fair to sue Suno, they are training their data on copyright material."
- Explanation: Directly states support for the suit and the allegation.
- "Do you honestly believe they didn't use any copywrite songs? Of course they did."
- Explanation: Asserts certainty about copyrighted training data without hedging.
- "The whole 'train the model and we will justify it later' is grossly negligent"
- Explanation: Frames Suno/AI companies as ethically irresponsible.

bornagainpenguin
- Idea: Counters that no one in chat actually knows the training set, and later criticizes the music industry’s hypocrisy and historical resistance to innovation.
- Stance: supportive of Suno / skeptical of labels
- Attitude: analytical, historical
- Evidence:
- "None of us actually know what the training data included. Only the Team know that."
- Explanation: Pushes back against unsupported certainty.
- "Assumptions are just that--assumptions."
- Explanation: Reinforces skepticism about claims made without evidence.
- "The Music And Film Industry Association of America™ ... have always resisted change"
- Explanation: Frames the lawsuit as part of a historical pattern.
- "It's an odd sort of business model that includes suing your bests customers."
- Explanation: Criticizes the labels’ incentives and behavior.

sushileafbeats
- Idea: Repeatedly argues the lawsuit logic is absurd, comparing AI training to human learning from music and blaming misuse on users, not toolmakers.
- Stance: strongly supportive of Suno / critical of lawsuit
- Attitude: sarcastic, frustrated
- Evidence:
- "i can also train myself to replicate a copywritten song. This is what i don't get about the whole issue."
- Explanation: Uses human imitation as a rebuttal to the copyright argument.
- "if you pick up a tool and commit a crime with it... the manufacturer of the tool should not even be a blip in the conversation."
- Explanation: Places responsibility on end users, not platform builders.
- "\"i guided your AI to do something it's not intended to do, by breaching ToS, and it listened. im suing you\""
- Explanation: Sarcastically summarizes the lawsuit as unreasonable.

great_paimon

- Idea: Provides references to the press statement and complaint documents, and summarizes the lawsuit as an expected industry move over alleged copyrighted training data and similar outputs.
- Stance: neutral
- Attitude: informative, measured
- Evidence:
- "The lawsuit document:"
- Explanation: Introduces primary-source material.
- "To summarize their complains:"
- Explanation: Signals a factual summary role.
- "Music groups alleging Suno trained on copyrighted material, a suit everyone expected to show up one day"
- Explanation: Concisely frames the conflict without taking a strong side.

Suno Team Response

furrybeans [Suno Team]
- The team response in the logs does not confirm any specific training sources, but challenges the framing that training on copyrighted content is obviously “illegal,” and later says public information is limited to press coverage.
- Evidence:
- "What data would be 'illegal'?"
- "What part of copyright law would prevent copyrighted content from being trained on?"
- "I don't know the details or how copyright comes into play with regard to training an AI"
- "All of the information available is in whichever articles have been written on the subject."

Topic: Unauthorized Voice / Audio Upload Misuse and Restrictions

Description

A recurring ethical/legal tension appears around the new audio upload feature: users discuss what is and is not allowed, especially the risk of uploading vocals, copyrighted material, or other people’s voices. The contention is not a heated argument as often as the lawsuit topic, but it still clearly contains ethical concern and repeated friction about misuse, restrictions, and false positives.

Two key tensions recur:
- Users explain that uploads with vocals cannot be made public because someone could use another person’s voice inappropriately.
- Users also discuss limits around copyrighted material in uploads and frustration when the system incorrectly detects “voice” in non-vocal audio.

Timeline

- **2024-06-22 00:38:38 - 2024-06-22 00:46:57**
- **2024-06-22 04:19:57 - 2024-06-22 04:20:13**
- **2024-06-22 06:16:18 - 2024-06-22 06:17:21**
- **2024-06-22 15:12:22 - 2024-06-22 15:21:48**
- **2024-06-22 15:53:43 - 2024-06-22 16:04:17**
- **2024-06-24 10:58:15 - 2024-06-24 11:00:01**
- **2024-06-25 15:12:13 - 2024-06-25 15:16:43**

- **2024-06-25 16:41:14 - 2024-06-25 16:42:58**

How the discussion evolved over time:
- Early in the logs, users clarify that uploaded samples with detected vocals cannot be made public, while instrument-only uploads can, provided they are not copyrighted.
- Then the ethical risk becomes explicit when users point out that allowing vocal uploads to go public could let someone make another person “say bad things.”
- Later, several users hit the restriction even with non-vocal audio and complain about false positives from the voice-detection system.
- By June 25, this becomes a repeated practical issue: people want to use their own sung/hummed clips but cannot publish them, and community members explain that this is because of the anti-misuse safeguard.

Key Participants

_123321_
- Idea: Notices uploaded tracks becoming public when they thought they should not be, leading into discussion about what uploads are allowed.
- Stance: neutral
- Attitude: curious, cautious
- Evidence:
- "those are the uploaded track and the two extension ... being public"
- Explanation: Flags the potential policy issue with uploaded content visibility.
- "which iirc should not be allowed"
- Explanation: Shows concern that uploaded content may be publicly visible when restricted.

.derbaum.
- Idea: Explains that public visibility is blocked only when voice is detected in uploads.
- Stance: neutral
- Attitude: informative
- Evidence:
- "the only samples you cant switch public are samples with voice"
- Explanation: States the core rule directly.
- "the detection looks for voice and if it sees some ... you cant enable the public switch."
- Explanation: Explains the mechanism behind the restriction.

h4a8
- Idea: Clarifies that vocals are currently not allowed to be public, and that non-copyrighted instrument uploads are allowed.
- Stance: neutral
- Attitude: matter-of-fact
- Evidence:
- "vocals are not allowed to be public at the mean time, you can use instruments as long as it not copyright material though"
- Explanation: Captures both the voice-restriction and copyright concern in one statement.

nolan0027
- Idea: Explicitly imagines deceptive use of audio input to fabricate “lost songs” with realistic backstories.
- Stance: critical
- Attitude: provocative, excited
- Evidence:

- "imagine joining a subreddit for a lost song and posting the fake full song and adding a realistic back story to how you found the Full song"
- Explanation: Directly raises an ethical misuse scenario involving deceptive fabricated media.
- "All for free!!!!!"
- Explanation: Adds excitement rather than concern, underscoring the ethically problematic nature of the suggestion.

spinz808.eth
- Idea: Wants an exception to make a song public after humming/beatboxing a melody, but hits the anti-voice restriction.
- Stance: critical of the restriction
- Attitude: frustrated, pleading
- Evidence:
- "i hummed/beatboxed a melody and it won't let me make my song public :((("
- Explanation: Illustrates the policy's friction for users uploading their own benign vocal material.
- "is there a way I can request a review to make my song public?"
- Explanation: Shows dissatisfaction and desire for manual override.

sushileafbeats
- Idea: Repeatedly explains the ethical reason for the restriction: otherwise people could misuse others' voices.
- Stance: supportive of the restriction
- Attitude: explanatory, practical
- Evidence:
- "because you could upload my voice and make me say bad things."
- Explanation: This is the clearest articulation of the ethical reason for the restriction.
- "cant make uploaded audio with voices public."
- Explanation: States the rule directly.
- "the 'VOICE' detecting filter, thinks your original audio piece you uploaded contains some form of vocals."
- Explanation: Explains false positives in the enforcement system.

kakermix
- Idea: Confirms that uploaded material with lyrics/vocals being non-public is an intentional developer choice.
- Stance: supportive
- Attitude: explanatory
- Evidence:
- "If your upload contains lyrics you can not set it public by *design*"
- Explanation: Says this is not accidental but deliberate policy.
- "That's an intentional choice by the Suno devs"
- Explanation: Reinforces that this is a designed safeguard.

great_paimon
- Idea: Suggests cleaner, simpler vocal uploads or converting them into MIDI/non-vocal cues to avoid false detections.
- Stance: neutral
- Attitude: helpful
- Evidence:
- "Try to do a simple do-do-da-da type of sound ... and try to ensure all background noises ... are removed"
- Explanation: Offers a workaround for the voice restriction and false positives.
- "make a simple MIDI of your simple tune and use that to extend"

- Explanation: Proposes a less risky method to preserve melody without problematic vocals.

Suno Team Response

furrybeans [Suno Team]
- Responds to user upload restrictions indirectly in the early upload-access discussion, but on this specific ethical/publication issue there is no direct detailed team explanation beyond participation in adjacent upload conversations.
- Evidence:
- Not enough evidence in the logs

Additional Evidence (Optional)

- "you can use instruments as long as it not copyright material though"
Explanation: Shows that copyright compliance for uploaded source material is explicitly part of the community's rule understanding.

- "someone could upload my voice and make me say bad things"
Explanation: This is the central ethical concern driving the restriction on public vocal uploads.

Topic: Trend Manipulation, Botting, and Fairness of Visibility

Description

A major recurring tension in the logs concerns whether the trending system is fair, whether users are gaming or botting it, and whether visibility depends more on social coordination than song quality. This directly connects to ethical fairness in platform use and, at times, to money/contest incentives.

The contention includes:
- Complaints that new or good songs do not get visibility.
- Suspicion that some songs/accounts are botting or otherwise gaming the system.
- Frustration that joke/meme songs or repeated reposts dominate attention.
- Discussion of "filtered" songs not reaching trending because of content moderation.

Timeline

- 2024-06-22 04:34:55 - 2024-06-22 04:46:26
- 2024-06-22 09:37:38 - 2024-06-22 09:59:26
- 2024-06-22 13:04:23 - 2024-06-22 13:09:55
- 2024-06-22 15:46:46 - 2024-06-22 15:57:57
- 2024-06-22 20:21:50 - 2024-06-22 20:28:39
- 2024-06-22 21:21:50 - 2024-06-22 21:24:39
- 2024-06-22 23:37:38 - 2024-06-22 23:59:26
- 2024-06-24 14:14:26 - 2024-06-24 14:16:19
- 2024-06-25 10:56:10 - 2024-06-25 10:58:24
- 2024-06-25 18:47:36 - 2024-06-25 19:00:01
- 2024-06-26 00:56:08 - 2024-06-26 01:00:01
- 2024-06-26 18:43:26 - 2024-06-26 18:50:52

How the discussion evolved over time:
- Early on, users wonder why they get so few views and speculate that Suno recycles already popular songs.
- Later, people discuss the “following” feed and repeated posting/spam, including users unfollowing others for flooding it.
- Multiple users begin openly referencing botting and “gaming the system,” especially around trending songs and contest pressure.
- By June 25–26, the tone becomes harsher: users call the front page “dishonest,” “copy/paste garbage,” or “bot heavy,” while others try to normalize it as how social platforms work.
- The fairness issue remains unresolved by the end; users continue disagreeing over whether trending reflects quality, manipulation, or just platform dynamics.

Key Participants

britishjuggernaut
- Idea: Complains that new songs are not surfaced fairly and that popular songs just recirculate.
- Stance: critical
- Attitude: frustrated
- Evidence:
- "I think Suno honestly just recycles already popular songs into recommending for people"
- Explanation: Direct criticism of discoverability fairness.
- "So new people's songs don't get shown as much"
- Explanation: Frames the issue as inequity for newer users.

teemuth
- Idea: Explains trending as based on likes and plays, sometimes with “weird logic.”
- Stance: neutral
- Attitude: informative
- Evidence:
- "To show in trending etc it relays on the likes your song has and the count of plays"
- Explanation: Provides a functional explanation of the system.
- "It has a weird logic sometimes"
- Explanation: Acknowledges inconsistency without claiming abuse.

sloppshot
- Idea: Repeatedly raises scam/bot concerns, and later joins in frustration around visibility and trending behavior.
- Stance: critical
- Attitude: suspicious, confrontational
- Evidence:
- "What for? You are a scammer. Using several identities.. being kinda shady.."
- Explanation: Shows direct suspicion toward untrusted promotion behavior.
- "can we get this trending"
- Explanation: Participates in explicit attempts to push songs up the charts.

degenlawyeroliver
- Idea: Openly strategizes around like-to-listen ratios to influence ranking and comments on “view botting.”
- Stance: critical of current system / exploit-aware
- Attitude: analytical, slightly ironic
- Evidence:

- "There is an easy way to play the cards: If we get a ratio of likes to listens that is as close to 1:1 as possible."
- Explanation: Shows users actively trying to optimize for algorithmic visibility.
- "Funny thing with my song about view bots: I really like it and would like to listen to it again and again, but don't want to screw the ratio"
- Explanation: Indicates he believes ratio gaming affects outcomes.

3daizy
- Idea: Feels unfairly filtered out of trending despite effort, and explicitly ties this to moderation/filtering decisions.
- Stance: critical
- Attitude: frustrated, hurt
- Evidence:
- "my super positive song is rejected somehow by trending ■"
- Explanation: Complaint that wholesome content was still blocked.
- "I worked so hard on Suno Discord whole week ... and this is my thanks ■"
- Explanation: Emotional reaction to perceived unfairness.
- "Suno doesn't love me ■"
- Explanation: Hyperbolic but clearly frustrated complaint.

odd101
- Idea: Harshly criticizes audience taste and says the better version of a song is not the one rewarded.
- Stance: critical
- Attitude: blunt, dismissive
- Evidence:
- "sad that suno website audience is trash"
- Explanation: Strong criticism of what gets rewarded.
- "waaaay better ... more energy ... more diversity ... better build up"
- Explanation: Argues a filtered/non-trending version was musically superior.

_123321_
- Idea: Repeatedly warns that trending can be easily gamed and should not determine self-worth.
- Stance: critical
- Attitude: cautionary, sardonic
- Evidence:
- "the trending ... can be rather easily gamed ... please don't tie your self worth to this type of stuff"
- Explanation: Explicitly frames trending as manipulable.
- "#1 is reserved for those who know how to game the system"
- Explanation: Stronger cynical statement that top placement is exploit-driven.

gunit518
- Idea: Condemns the trending page as dishonest, unoriginal, bot-heavy, and saturated by low-substance songs.
- Stance: critical
- Attitude: angry, contemptuous
- Evidence:
- "Lmao what is up with Suno's top music right now? Its almost all the same song."
- Explanation: Complaint about homogeneity.
- "I personally feel like Suno's top music feels dishonest, and unoriginal."
- Explanation: Direct indictment of the ranking environment.
- "It feels so bot heavy right now."
- Explanation: Explicitly alleges manipulation.

sushileafbeats
- Idea: Agrees trending is partly manipulated by cliques/circles and criticizes low-effort attempts to win attention or money.
- Stance: critical
- Attitude: frustrated, passionate
- Evidence:
- "there is 100% a circle of users who play the hell out of it"
- Explanation: Alleges coordinated behavior in trending.
- "if you don't have a place to go ask 30 people to like your track within 10 minutes of your publishing it, you're not gonna slide into the top rows"
- Explanation: Describes social amplification as the real determinant of rank.
- "It's gross."
- Explanation: Explicit condemnation.

Suno Team Response

furrybeans [Suno Team]
- No direct defense or redesign explanation for trend fairness is present in the logs, but team responses clarify adjacent moderation/filtering issues in other discussions.
- Evidence:
- Not enough evidence in the logs

Additional Evidence (Optional)

- "Dumb memes trend easier than things with effort"
Explanation: Concise summary of one recurring fairness complaint.

- "I just have no idea how anyone is getting the numbers they get on trending"
Explanation: Captures confusion and suspicion from ordinary users about visibility mechanics.

Topic: PG-13 Moderation, Sexual Content, and Community Standards

Description

A recurring ethical/moral conflict in the logs concerns what should be allowed in this Discord community under its PG-13 rules. Tension appears around songs or images with sexual implications, innuendo, or profanity, and around moderation consistency.

This is squarely ethical/moral because users argue over what is acceptable creative expression versus what violates the server’s standards.

Timeline

- 2024-06-22 14:09:04 - 2024-06-22 14:14:26
- 2024-06-22 15:46:13 - 2024-06-22 15:57:39
- 2024-06-24 20:05:45 - 2024-06-24 20:15:49
- 2024-06-24 20:43:20 - 2024-06-24 20:44:45

- **2024-06-25 07:50:50 - 2024-06-25 07:57:11**
- **2024-06-25 16:00:16 - 2024-06-25 16:12:58**

How the discussion evolved over time:
- It begins with users asking for an “explicit” or adult-content option and another user objecting that “censorship doesn’t belong in art.”
- Team/mod responses redirect people to suggestions and reinforce the PG-13 nature of the server.
- Later, there are disputes over specific songs that users think should or should not be removed for sexual implication.
- The issue escalates when a user challenges moderation consistency, while others defend the rule and say innuendo can still violate PG-13.

Key Participants

the_laughing_man
- Idea: Argues for an explicit-label option and against censorship in art.
- Stance: critical of restrictions
- Attitude: assertive
- Evidence:
- "Censorship doesn't belong in art."
- Explanation: Direct ideological challenge to PG-13 moderation.
- "Which is why I keep telling them to let us mark songs as 'Explicit'"
- Explanation: Proposes a labeling solution rather than outright prohibition.

build.a.better.world
- Idea: Enforces the PG-13 standard and redirects suggestions into formal channels.
- Stance: supportive of moderation
- Attitude: polite, firm
- Evidence:
- "Appreciate your creativity, but going to have to ask you to remove this… PG-13 server ■"
- Explanation: Direct moderation request based on community standards.
- "I’d like to have an available rating on display"
- Explanation: Shows openness to better labeling while keeping current moderation.

sushileafbeats
- Idea: Strongly enforces the rule against innuendo/sexual content and objects to inconsistent enforcement.
- Stance: supportive of restrictions
- Attitude: frustrated, confrontational
- Evidence:
- "the server is pg13. you can't post music about cyber girls."
- Explanation: States the rule plainly in a live dispute.
- "innuendo is also considered not pg13. you can't hint at obvious explicit things to skirt around it."
- Explanation: Clarifies that implication still counts as violation.
- "I'll never be silent about rule breaking"
- Explanation: Shows a proactive enforcement attitude.

heliostasus / XENOX
- Idea: Defends a criticized song as compliant and objects to being policed by ordinary users.
- Stance: critical of enforcement in that case
- Attitude: defensive
- Evidence:

- "My songs and artwork are compliant with all rules"
- Explanation: Explicit disagreement with others' moderation judgment.
- "I watched you guys attack a moderator"
- Explanation: Deflects from the content issue toward moderation conflict.

3daizy
- Idea: Confirms certain content is not suitable for the PG-13 Discord and rejects the idea of a PG-18 server.
- Stance: supportive of restrictions
- Attitude: authoritative, explanatory
- Evidence:
- "This song is not suitable as it contains explicit and suggestive content, which violates our PG-13 and NSFW guidelines."
- Explanation: Clear enforcement statement.
- "Introducing a PG-18 channel contradicts the community guidelines"
- Explanation: Rejects the compromise of a separate adult section.
- "Not gonna work. This is a company."
- Explanation: Grounds moderation in organizational context, not just personal preference.

animuse_music
- Idea: Suggests a separate adult/PG18 space might make sense for mature but not malicious content.
- Stance: critical of current restrictions / mixed
- Attitude: calm, exploratory
- Evidence:
- "But a PG18 channel for more adult themes is a good idea tho."
- Explanation: Suggests an alternative structure rather than rejecting moderation entirely.
- "It was not really hating on anyone or in bad taste. It was just about the protagonist of the song being into it"
- Explanation: Argues that some sexual themes may be harmless in tone.

Suno Team Response

build.a.better.world
- Reaffirms the server's PG-13 moderation and redirects feature/rule suggestions to the suggestions channel.
- Evidence:
- "PG-13 server ■"
- "mind sharing it in #■■suggestions-web so it doesn't get lost in traffic here?"

3daizy
- States that certain songs are not acceptable because of explicit/suggestive content and rejects a PG-18 subspace.
- Evidence:
- "This song is not suitable as it contains explicit and suggestive content"
- "Introducing a PG-18 channel contradicts the community guidelines"

Additional Evidence (Optional)

- "the only thing you can do, is split."
Explanation: Shows moderation chose structural workarounds rather than relaxing PG-13 rules.

- "my songs are good and wholesome ■"

Explanation: Shows frustration from users whose songs were filtered despite feeling harmless to them.

Chunk 8: 2024-06-26 to 2024-06-29

Topic: Copyright, Lawsuit, and Record Labels vs AI Music Platforms

Description

A recurring point of contention is whether record-label lawsuits against AI music platforms are justified, and what that means for users and the future of AI music. Multiple users criticize the lawsuits as greedy, anti-competitive, or misguided, while a smaller number express concern that the lawsuits may have merit. The discussion repeatedly returns over the day, often after users mention news coverage or ask whether Suno is “being sued.”

The dominant friction is not between strongly opposed factions with detailed legal arguments, but between:
- users strongly defending AI music generation and criticizing record labels, and
- users who express concern or uncertainty about the legal case.

The topic is explicitly ethical/legal and tied to AI music use. Users discuss training data, copyright, ownership, industry control, whether AI “learns” like humans, and whether labels are trying to suppress competition.

Timeline

- 2024-06-26 07:22:50 - 08:10:48
- 2024-06-26 08:37:38 - 08:44:39
- 2024-06-26 11:14:23 - 11:18:10
- 2024-06-26 13:02:51 - 13:05:44
- 2024-06-26 13:39:04 - 13:55:54
- 2024-06-26 15:32:19 - 15:34:31
- 2024-06-26 15:55:57 - 15:57:31
- 2024-06-26 16:44:17 - 16:45:16
- 2024-06-26 17:35:03 - 17:45:14
- 2024-06-27 03:56:58 - 04:05:24
- 2024-06-27 15:37:02 - 16:03:17
- 2024-06-27 21:06:47 - 21:08:35
- 2024-06-28 18:04:15 - 18:10:13
- 2024-06-29 15:16:03 - 15:20:14
- 2024-06-29 18:15:11 - 18:22:24

How the discussion evolved over time:
- Early discussion ties legal worries to product quality and user anxiety: one user says, “I hope the legal issues will not affect the quality of the product now.”
- It then broadens into anti-label rhetoric, with several users framing lawsuits as corporate protectionism and “greedy big wigs.”

- Midday, the conversation becomes more specific: users mention the RIAA, major labels, and compare the issue to earlier tech disruptions.
- Later, one user reports a distributor rejecting their AI-assisted music as “derivative,” shifting the discussion from abstract lawsuits to practical downstream distribution problems.
- By the end of the logs, the conversation revisits whether training on copyrighted music is inherently unlawful, with several users arguing it is analogous to human learning and others acknowledging risk but mostly dismissing the labels’ claims.

Key Participants

s476633
- Idea: Suggests current product oddities may be linked to legal issues and worries that legal pressure could affect quality.
- Stance: critical
- Attitude: worried
- Evidence:
- "I hope the legal issues will not affect the quality of the product now"
- Explanation: This explicitly links legal controversy to product quality concerns.

theserene
- Idea: Opposes the RIAA and says they are keeping a paid subscription partly as defiance.
- Stance: critical
- Attitude: defiant
- Evidence:
- "I haven't been a fan of the RIAA for such a long time. I'm keeping my Suno sub at $30 just as an FU to them."
- Explanation: This directly states opposition to the RIAA and frames continued payment as protest.

kneejaw
- Idea: Strongly anti-RIAA; also repeatedly downplays immediate consequences by saying lawsuits take a long time.
- Stance: critical
- Attitude: dismissive, calm
- Evidence:
- "I've never ever been a fan of the RIAA and I never will be."
- Explanation: Clear anti-RIAA position.
- "Lawsuits take a very, very, very long time to resolve"
- Explanation: This minimizes urgency and steers discussion away from panic.

qni xsynapse
- Idea: Raises concern about the lawsuit and speculates that ownership structure or similarity to existing artists could create legal difficulty.
- Stance: critical/concerned
- Attitude: uneasy, analytical
- Evidence:
- "BTW, I am wondering about that lawsuit filed against SUNO and UDIO."
- Explanation: Opens the issue directly.
- "This FAQ actually means that SUNO owns the song... so I think it will be very difficult for SUNO to get away from this situation."
- Explanation: Expresses concern that Suno may have legal exposure.
- "this song is just so Sabaton"
- Explanation: Raises similarity concerns tied to the legal debate.

umbrellamick
- Idea: Argues the legal claims are premature and mostly hype/hysteria without conclusion.
- Stance: supportive of Suno / critical of lawsuit
- Attitude: dismissive, confident
- Evidence:
- "without conclusion it is a form of baseless allegation and conjecture"
- Explanation: Explicitly frames the accusations as unsupported.
- "It is merely creating talking points to raise hype and hysteria"
- Explanation: Shows a dismissive view of the lawsuit's legitimacy.

iicaptain73
- Idea: Finds it revealing that higher-quality AI music now attracts legal attention; later describes distributor rejection of AI music as insulting and hypocritical.
- Stance: critical of labels/distributors
- Attitude: frustrated, sarcastic
- Evidence:
- "Chirp v1 was not viewed as a threat but now that the quality is vastly improved ... there is $$$ involved."
- Explanation: Suggests lawsuits are driven by money once AI became competitive.
- "My distributor denied my last upload stating it was derivative of another work."
- Explanation: Introduces a concrete downstream legal/business consequence.
- "the email response was actually insulting and unprofessional"
- Explanation: Shows frustration with anti-AI distributor behavior.

mtsart
- Idea: Asks whether users should be concerned and whether using their own lyrics changes the legal risk.
- Stance: concerned
- Attitude: uncertain
- Evidence:
- "Damn just saw video about labels suing Suno, should I be concerned?"
- Explanation: Directly asks whether the lawsuit poses a risk.
- "Or I am good since I use my own lyrics ?"
- Explanation: Shows specific uncertainty about legal implications for users.

sushileafbeats
- Idea: Repeatedly argues the lawsuits are baseless, driven by greed, and comparable to ordinary human learning from music. Also defends Suno and warns against overstating legal claims.
- Stance: supportive of Suno / critical of lawsuit
- Attitude: forceful, dismissive
- Evidence:
- "its never gonna go anywhere. its greedy big wigs looking for any opportunity to squeeze money out of something."
- Explanation: Strongly dismisses the lawsuit as greed-driven.
- "they wont win regardless. what they are trying to prove is baseless."
- Explanation: Explicit claim that the case lacks merit.
- "these labels are trying to argue that its somehow illegal to learn something from other music"
- Explanation: Frames AI training as analogous to ordinary learning.
- "the only people that will be found at fault in the end, is the staff with these labels that WILLINGLY broke Suno/Udio terms of service"
- Explanation: Pushes the blame back onto label-affiliated testers.

offtherocker
- Idea: Compares suits against Suno to broader corporate overreach and says if they sue Suno they might as well sue text generators too.
- Stance: critical of lawsuit
- Attitude: mocking, dismissive
- Evidence:
- "if they're gonna sue suno, they might as well go after text generators too like novelai, corpos are ridiculous"
- Explanation: Criticizes the lawsuits as overbroad and absurd.

holykylin
- Idea: Defends AI music as fulfilling musical aspirations blocked by existing systems and supports “whoever can break the old ways.”
- Stance: supportive of AI music / critical of old industry order
- Attitude: idealistic
- Evidence:
- "AI music fulfills their dreams. I support whoever can break the old ways"
- Explanation: Ethical defense of AI music as democratizing creation.

artelo
- Idea: Treats the lawsuit as an old-industry reaction against disruption, comparing labels to taxis vs Uber.
- Stance: critical of lawsuit
- Attitude: cynical, mocking
- Evidence:
- "Still funny record labels are playing the same role as taxis vs uber"
- Explanation: Frames labels as incumbents resisting innovation.
- "Corporate lawfare is by all means the stupidest thing"
- Explanation: Explicit criticism of litigation strategy.

heliostasus
- Idea: Strongly argues labels misunderstand AI and that the litigation is misguided and wasteful.
- Stance: critical of lawsuit
- Attitude: assertive, dismissive
- Evidence:
- "The entire approach of the Record Label industry trying to sue AI music generators is stupid and all wrong"
- Explanation: Clear opposition to the lawsuit.
- "They clearly don't understand how AI works"
- Explanation: Claims the plaintiffs misunderstand the technology.
- "that's why they will fail in their litigation attempts"
- Explanation: Predicts legal failure.

bigyellobalinsky
- Idea: Unlike many others, says the labels “seem to have a solid case.”
- Stance: critical/concerned toward Suno’s position
- Attitude: resigned
- Evidence:
- "they seem to have a solid case against them. Unfortunately."
- Explanation: One of the clearest statements in the logs expressing belief that the plaintiffs may win.

kregonofthedarkworld

- Idea: Argues the music industry is hypocritical, repetitive, and corrupt, while AI tools give ordinary people access to creation.
- Stance: supportive of AI music / critical of labels
- Attitude: angry, ranting
- Evidence:
- "This lawsuit should be thrown out because they're doing the same shit they're accusing SUNO of"
- Explanation: Explicitly calls the case hypocritical.
- "music industry is nothing but a bunch of hypocrites"
- Explanation: Clear condemnation of the industry.
- "this is going to make sure that the radio goes extinct as well because people can generate whatever they want"
- Explanation: Frames AI as disruptive and empowering.

neverward
- Idea: Says human-made art/music will still be valued, but AI will coexist and displace lower-end commissioned work.
- Stance: supportive of coexistence / neutral on total replacement
- Attitude: reflective
- Evidence:
- "I don't think human-made music is ever going to stop being on top personally, but they will certainly coexist."
- Explanation: A more balanced view than outright anti-label or pro-total-replacement takes.

Suno Team Response

No response from Suno team in the logs

Additional Evidence (Optional)

"Riaa is attacking suno"
Explanation: Shows the lawsuit became a recurring topic users kept reintroducing throughout the logs.

"hope suno will be okay"
Explanation: Captures the anxiety among users about the platform’s future.

Topic: Copyright, Ownership, and Terms of Service for Audio Uploads / Covers / Existing Songs

Description

A major legal/ethical conflict centers on what users are allowed to upload or generate with Suno, especially after audio upload becomes more broadly available. Users repeatedly ask whether they can upload copyrighted songs, covers, famous samples, Windows sounds, game music, or voice clips; others respond by citing Suno’s terms and warning about bans, copyright liability, and ownership issues.

This is one of the clearest sustained tensions in the logs: some users want to use existing copyrighted material “just for fun” or privately, while moderators, guides, and Suno team repeatedly state that users must own or control rights to uploaded material. Conflict arises because some users resist or try to find loopholes (“if it’s private,” “if it’s not monetized,” “if it’s only six seconds,” “if I play it myself”), while others insist the rules are explicit.

Timeline

- 2024-06-26 04:03:11 - 04:06:36
- 2024-06-26 08:39:14 - 08:44:39
- 2024-06-26 09:00:33 - 09:06:23
- 2024-06-26 09:21:18 - 09:21:30
- 2024-06-26 13:55:57 - 13:57:31
- 2024-06-28 18:03:36 - 18:10:13
- 2024-06-28 21:47:49 - 22:00:05
- 2024-06-29 00:57:19 - 01:03:17
- 2024-06-29 10:07:32 - 10:10:13
- 2024-06-29 15:56:28 - 16:00:14
- 2024-06-29 17:58:47 - 18:06:47
- 2024-06-29 20:15:11 - 20:18:49
- 2024-06-29 23:29:40 - 23:35:47

How the discussion evolved over time:
- Earlier logs already show users explaining upload restrictions in practical terms: “you need to own the stuff you upload.”
- As audio upload expands, questions become much more frequent and specific: users ask about copyrighted tracks, covers, game soundtracks, voice clips, public-domain songs, royalty-free assets, and whether private use changes anything.
- Moderators and team members repeatedly restate the same rule: uploaded material must be owned or rights-controlled by the uploader.
- Later discussion intensifies as users openly admit experimenting with copyrighted material, and moderators/guides warn that even private/testing use can violate ToS.
- By the end, the channel shows visible enforcement behavior: songs are removed from chat, users are warned, and people cite the upload agreement directly.

Key Participants

lessloveless
- Idea: Initially asks practical legal questions about audio inputs and covers, trying to understand what is allowed.
- Stance: neutral/inquisitive
- Attitude: uncertain
- Evidence:
- "Audio inputs aren't for like, copywritten stuff but more for your own stuff"
- Explanation: Raises the copyright boundary around upload audio.
- "Like what if I cover, something from Persona... That bad?"
- Explanation: Asks directly whether a user-made cover is permitted.

moggity
- Idea: Repeatedly states that users must own rights to uploaded material and gives a practical copyright test.
- Stance: restrictive / protective of rights

- Attitude: explanatory
- Evidence:
- "you need to own the stuff you upload"
- Explanation: Clear statement of the rule.
- "if I tried to sell this to a record company would they think it was a breach of copyright?"
- Explanation: Offers a practical standard for judging whether something is too derivative.

sushileafbeats
- Idea: Strongly insists users must own uploaded audio and often warns others not to violate ToS.
- Stance: restrictive / rule-enforcing
- Attitude: firm, admonishing
- Evidence:
- "you need to own the rights to the stuff you upload"
- Explanation: Reiterates upload-rights requirement.
- "you're still breaking Suno ToS, and could be banned."
- Explanation: Warns that even private misuse can still violate the rules.
- "I know in this day and age we click through terms instantly... but its important here lol."
- Explanation: Explicitly frames ToS compliance as essential.

iicaptain73
- Idea: Corrects users trying to justify unauthorized uploads and emphasizes ToS.
- Stance: restrictive / rule-enforcing
- Attitude: corrective
- Evidence:
- "incorrect. You are breaching Terms of Service by uploading audio YOU DO NOT OWN."
- Explanation: Direct correction of a user suggesting private use might be okay.
- "If you are trying to exactly replicate known artists that's not what Suno is for."
- Explanation: Rejects attempts to use Suno for imitation/copying.

offtherocker
- Idea: Warns users not to use celebrity mimicry or Nintendo-related copyrighted sounds lightly.
- Stance: restrictive/cautious
- Attitude: cautionary
- Evidence:
- "best not to try to mimic celebrities or anything"
- Explanation: Warns against voice/artist imitation.
- "careful with anything nintendo"
- Explanation: Warns about highly protective IP holders.

britishjuggernaut
- Idea: Gives practical answers but sometimes pushes for broader allowable use of non-copyrighted / royalty-free material.
- Stance: mixed but often restrictive in ToS terms
- Attitude: matter-of-fact
- Evidence:
- "Pretty much, I find sound effects to be funny tho lol"
- Explanation: Practical explanation of upload use.
- "Not allowed (which is dumb)"
- Explanation: Acknowledges Suno’s restriction while criticizing it.
- "You agreed to not use copyrighted lyrics when you started making songs."
- Explanation: Reinforces the platform rules later in the logs.

furrybeans [Suno Team]

- Idea: Repeatedly clarifies that users must own rights to uploaded audio and warns about copyrighted uploads.
- Stance: restrictive / official clarification
- Attitude: clear, cautionary
- Evidence:
- "Upload Audio requires that you own rights to the audio being uploaded."
- Explanation: Clear official restatement of policy.
- "As a reminder, you would've had to agree to this to use the upload feature"
- Explanation: Refers directly to the explicit upload agreement.
- "It's still not OK even if that filter doesn't stop you uploading someone else's stuff."
- Explanation: Says filter failure does not make unauthorized uploads permissible.

.derbaum.
- Idea: Repeatedly warns users that violating upload rules can lead to bans, account deletion, or worse legal consequences.
- Stance: restrictive / strongly cautionary
- Attitude: blunt, warning
- Evidence:
- "if it doesnt get filtered out at the upload you ... break Sunos tos by uploading copyrighted material"
- Explanation: Early warning about upload misuse.
- "sunos terms say that you are responsible for any kind of violations"
- Explanation: Frames liability as user-side.
- "3 for the price of 1."
- Explanation: Refers to breaking ToS, possibly getting banned from Discord, and being sued.

cadence1087
- Idea: Distinguishes between extending an existing Suno song and uploading external copyrighted material; says private extension of another’s Suno song is different from uploading copyrighted music.
- Stance: cautious / nuanced
- Attitude: analytical
- Evidence:
- "I misunderstood what you said. I thought you were extending a song already in Suno. If you're uploading someone else's work, I imagine Suno might flag you"
- Explanation: Separates two similar but different situations.

Deleted User
- Idea: Admits to making covers privately “for fun” and then backs down after repeated warnings.
- Stance: initially dismissive of restriction, later compliant
- Attitude: excited, then apologetic
- Evidence:
- "so much doing covers of popular songs^^ not for public buts great"
- Explanation: Admits doing the prohibited thing privately.
- "ah ok damn sorry guys"
- Explanation: Acknowledges the warnings.
- "werde mich daran halten"
- Explanation: Says they will follow the rule going forward.

nolan0027
- Idea: Repeatedly tests the boundaries, asking whether private, unlisted, or deleted use of copyrighted uploads would still be a problem.
- Stance: loophole-seeking / uncertain
- Attitude: probing
- Evidence:

- "what if i make the extended song private?"
- Explanation: Looks for a private-use loophole.
- "Will i be sued if i extend an audio thats not owned by me"
- Explanation: Explicitly asks about legal consequences.
- "Im gonna do it"
- Explanation: Indicates willingness to test the boundaries.

Suno Team Response

furrybeans [Suno Team]
- Repeatedly states that upload audio is only for material the user owns or controls rights to.
- Says filter misses do not legitimize uploads.
- Refers users back to the upload agreement and policy.
- Evidence:
- "Upload Audio requires that you own rights to the audio being uploaded."
- "It's still not OK even if that filter doesn't stop you uploading someone else's stuff."
- "As a reminder, you would've had to agree to this to use the upload feature"

Additional Evidence (Optional)

"you need to own the rights to the stuff you upload"
Explanation: Central recurring rule stated by multiple users.

"you are breaching Terms of Service by uploading audio YOU DO NOT OWN."
Explanation: Strongest concise formulation of the issue.

Topic: Song Theft, Republishing, and Third-Party Use of Suno Songs

Description

Another legal/ethical tension concerns people taking Suno-generated songs and reposting, monetizing, or hosting them elsewhere without permission. Users discuss songs being uploaded to YouTube/Spotify by other people first, fear their music will be stolen, and a third-party site allegedly mirroring trending Suno songs. This is clearly about ownership, consent, and platform misuse.

The tension here is not abstract copyright law but practical misuse:
- users fear losing control of songs they created,
- some report examples of theft or external reposting,
- others discuss whether public songs are effectively “free to use,” which creates friction.

Timeline

- **2024-06-26 03:50:50 - 03:53:22**
- **2024-06-26 04:39:14 - 04:39:43**
- **2024-06-26 09:21:18 - 09:21:30**

- **2024-06-26 16:53:27 - 16:56:30**
- **2024-06-26 18:15:19 - 18:18:25**
- **2024-06-27 15:56:19 - 15:56:30**
- **2024-06-29 12:36:52 - 12:43:38**

How the discussion evolved over time:
- It starts with light discussion of distribution platforms and monetization.
- Then users start asking permission norms for extending others' songs and mention songs being stolen to YouTube.
- Concrete cases appear: one user says another person uploaded "Cat Cat Cat" before the original publisher.
- By 2024-06-29, users discover a third-party site hosting Suno songs, which triggers concern over whether this is legal and who owns what.

Key Participants

britishjuggernaut
- Idea: Discusses distribution options and later explains that some songs/sounds can be reused only if rights permit.
- Stance: practical / mixed
- Attitude: matter-of-fact
- Evidence:
- "Try routenote or TunePartner"
- Explanation: Starts from practical distribution/monetization concerns.
- "You can find songs to be used ... only if not copyrighted or copyrighted under your control"
- Explanation: Shows concern with downstream rights use.

sushileafbeats
- Idea: Strongly insists users ask permission before extending others' songs and warns against reposting or misuse.
- Stance: protective of creator rights
- Attitude: firm
- Evidence:
- "you can extend other users' songs. (please ask them permission first tho)"
- Explanation: Explicitly states permission norm.
- "this is why will not disclose to my distributor that my work is AI based ... if they come back at me about it one day im happily going to say 'PROVE IT'."
- Explanation: Shows concern over downstream ownership/control and defensive posture.

privateriem
- Idea: Highlights the contradiction between wanting feedback/publicity and fearing theft; says people have reposted others' songs to YouTube for monetization.
- Stance: concerned
- Attitude: wary
- Evidence:
- "The duality of man: -The desire for feedback on our song on discord -The fear of having our songs stolen on discord"
- Explanation: Concisely frames the core tension.
- "people have made youtube accounts for posting and trying to monetize other people' suno songs"
- Explanation: Explicitly identifies misuse.

alliecat4

- Idea: Says the main copyright problems they've heard about involve someone stealing a song and uploading it first.
- Stance: concerned but practical
- Attitude: explanatory
- Evidence:
- "The only problems I have heard of with copyright have been when someone stole a song and uploaded it to YouTube as their own song"
- Explanation: Gives a specific form of misuse users should watch for.

great_paimon
- Idea: Reports a concrete theft/distribution case involving another user's song being uploaded by many people before the original release completed.
- Stance: concerned
- Attitude: factual
- Evidence:
- "by the times the songs were successfully distributed, 8 (iirc) other people had taken and successfully distributed that song"
- Explanation: Strong concrete evidence of third-party appropriation.

cy4x
- Idea: Reacts strongly to discovery that another website is hosting users' songs and suggests it may be illegal.
- Stance: critical
- Attitude: alarmed
- Evidence:
- "wait they actually are"
- Explanation: Reaction to songs appearing on another site.
- "that's not legal right?"
- Explanation: Directly questions legality.
- "fellow music gen site ripping off suno and stealing their content"
- Explanation: Frames it as theft.

offtherocker
- Idea: Says they do not want their rights-controlled content hosted on another site without permission.
- Stance: critical
- Attitude: protective
- Evidence:
- "I don't really want my content hosted on another site without my permission that I have rights to"
- Explanation: Clear objection to third-party reposting/hosting.

chavillepleop
- Idea: Reports seeing songs mirrored on another site and asks whether it is legal.
- Stance: concerned
- Attitude: cautious
- Evidence:
- "some of the songs I shared on suno have been uploaded to this site"
- Explanation: Introduces the third-party hosting issue.
- "can you share with us when you find out whether it is legal or not?"
- Explanation: Shows uncertainty and concern.

Suno Team Response

No response from Suno team in the logs

Additional Evidence (Optional)

"you can extend other users' songs. (please ask them permission first tho)"
Explanation: Shows a user-established norm around consent and reuse.

"it has stolen many of Suno's songs"
Explanation: Direct accusation that a third-party site is taking user-created songs.

Topic: AI Music as Replacement vs Coexistence with Human Creativity

Description

A broader ethical debate appears around whether AI music should replace parts of the music industry, democratize creativity, or remain secondary to human-made work. This is more philosophical than the lawsuit discussion, but still clearly tied to ethics and the future of AI music generation.

There is some disagreement:
- some users celebrate AI as a way to “break the old ways” and bypass gatekeepers,
- others say human-made music will remain superior or that AI music itself won’t become the main money-maker,
- several criticize the music industry as repetitive and artificial already.

Timeline

- **2024-06-26 08:26:08 - 08:26:08**
- **2024-06-26 13:55:54 - 13:57:24**
- **2024-06-27 03:59:42 - 04:06:32**
- **2024-06-27 04:01:27 - 04:06:32**

How the discussion evolved over time:
- Starts with general support for breaking “old ways.”
- Develops into a discussion of whether AI music itself can make money or whether only the tools/platforms will profit.
- Ends in a coexistence argument: AI may replace lower-end commercial work, but excellent human-made work will remain valued.

Key Participants

holykylin
- Idea: Supports AI music as dream-fulfilling and disruptive to old systems.
- Stance: supportive
- Attitude: idealistic
- Evidence:

- "AI music fulfills their dreams. I support whoever can break the old ways"
- Explanation: Clear ethical endorsement of AI as liberating.

heliostasus
- Idea: Thinks AI music won't dominate as the profit center, but the tools will; sees users as "their own Record Label."
- Stance: mixed/supportive
- Attitude: reflective
- Evidence:
- "AI music won't really be able to make money in the long run, but the mediums in which it is made will"
- Explanation: Distinguishes between the tool's value and the output's market value.
- "you are your own biggest fan"
- Explanation: Frames AI music as user-personalized creation rather than a mainstream replacement.

neverward
- Idea: Human-made music and art will remain on top, but AI will coexist and replace lower-end commissioned work.
- Stance: balanced/supportive
- Attitude: thoughtful
- Evidence:
- "human-made music is ever going to stop being on top personally, but they will certainly coexist"
- Explanation: Clear coexistence model.
- "the fantastic and unique traditional artists will always be revered and appreciated"
- Explanation: Explicitly protects space for human creativity.

kregonofthedarkworld
- Idea: AI gives people the power to create outside gatekept systems and may help kill a corrupt industry.
- Stance: supportive of AI / anti-industry
- Attitude: angry, revolutionary
- Evidence:
- "this is going to make sure that the radio goes extinct as well because people can generate whatever they want to listen to"
- Explanation: Predicts AI-generated personalization will displace older systems.
- "AI music should kill it quickly"
- Explanation: Strong replacement-oriented rhetoric.

Suno Team Response

No response from Suno team in the logs

Additional Evidence (Optional)

"Music should be a global treasure"
Explanation: This reflects the ethical framing that AI tools should remain accessible and not be monopolized.

If you want, I can also produce:
1. a participant-by-participant index across all topics, or
2. a compressed list of only the strongest evidence snippets for each topic.
